Barr's Pure Lawn Grass Seeds

For producing Beautiful Lawns, Tennis and Cricket Grounds, Bowling Greens, etc.
 ☛ *Renovate Lawns, etc., in September, after the wear and tear of Summer (35 lb. of Grass Seed per acre).*

The following Mixtures of Grass Seeds are composed of thoroughly cleaned seeds of highest quality only, and contain neither Clover nor coarse Grasses; they cannot fail to give the greatest satisfaction.

☛ The seed is sold by weight, being the only correct method of estimating the quantity needed for a given space.

Leaflet on the Management of Lawns free on application.

Barr's New Mixture of Dwarf Evergreen Grasses for producing an Extra Fine Smooth Lawn, a special mixture of the finest-leaved and dwarfest-growing perennial grasses, which from their fine, close, slow habit of growth and pleasing colour are best suited for forming lawns of the shortest and finest herbage, and thus greatly economising labour in mowing. Per lb. 2s.; 10 lb. for 19s.; 25 lb. for 46s.

Barr's "Standard" Evergreen Grasses, for Garden Lawns, Tennis Courts, etc. This mixture is composed principally of the fine-leaved dwarf-growing grasses, all the seeds being highly cleaned and of pure and genuine quality. Per lb. 1s. 7d.; 10lb. for 14s. 6d.; 25 lb. for 35s.

Barr's "Thames Embankment" Evergreen Grasses for Parks, Golf Links, Cricket Grounds, and Bowling Greens, a special mixture which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Per lb. 1s.; 25 lb. for 24s.

Barr's Special Mixture of Evergreen Grasses for sowing under Trees. This mixture contains a careful selection of those grasses most suitable for sowing under trees or in shady places. Per lb. 2s. 3d.; per 10 lb. 21s.

Barr's Fine-leaved Fescue Grass (*Festuca ovina tenuifolia*), for sowing where little bulbs are to be naturalised, like Narcissi Cyclamineus, Minimus, Queen of Spain, etc.; also Scillas, Chionodoxas, Snowdrops, etc. Per lb. 2s. 6d.

Dutch Clover, Finest White. No Clover is included in the above mixtures of Grasses, as we consider a lawn should consist of Grass alone. If Clover is desired, however, it may be used at the rate of 3 to 5 lb. per acre; but it is preferable to sow the Clover separately from the Grass Seed. Per lb. 1s. 6d.

Barr's Special Lawn Phytobroma.

The best manure for Grass Lawns, Tennis Courts, Bowling Greens, Golf Links, etc.

Apply Spring and Autumn, using 2 oz. to the square yard at each application.

Barr's Lawn Phytobroma is composed of those ingredients calculated to encourage a vigorous growth of grass only, and in this respect differs from the potish manures, which are apt to stimulate clovers and coarse weeds. We can confidently recommend it for all grass-lands, as, by its use, a thicker growth and a richer colour will be obtained. It is a highly concentrated manure, and is therefore economical in use, a small quantity only being required at each application. *Circular with fuller particulars sent on application.*

Nett Prices—2 lb. tin, 1s.; In bags—7 lb., 2s. 6d.; 14 lb., 4s. 6d.; 28 lb., 7s. 6d.; 56 lb., 12s. 6d.; 1 cwt., 20s. *Prepaid Orders for 28 lb. and upwards sent Carriage Paid to any station in Great Britain or to any port on the Irish Coast.*

Watson's Lawn Sand or Weed Destroyer.

WATSON'S LAWN SAND is the best Weed Killer for use on Lawns (4 oz. to the square yard). This preparation has the remarkable property of destroying Daisies, Plantains, Dandelions, etc., on lawns, and at the same time acts as a manure and improves the Grass, enriching the colour and thickening the sward. *Circular with full directions on application.*

Nett Prices—Canisters, 1s., 2s. 6d. and 5s. 6d.; per ½ cwt., 9s. 6d.; ¼ cwt., 18s.; 1 cwt., 34s.

BARR'S AUTUMN BULB CATALOGUE.

1906

A FEW PRACTICAL HINTS ON BULB CULTURE.

Culture for Spring-flowering Bulbs out of Doors.

Proper Condition of Soil.—Plant bulbs only when the ground is in a nice friable state, and never when the soil is wet and sticky; in such cases plant later when the soil is in a good friable condition.

Preparing Ground for Bulbs.—After digging or trenching, the ground should be allowed to settle at least ten days before planting.

Depth to Plant.—Many amateurs commit the fault of planting too deeply, and thousands of bulbs are spoilt in this way annually (crocus especially). A good general rule to follow is, to cover the bulb with soil once and a half to twice its own depth, but not more, *measuring the bulb* from base to shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil, and a crocus bulb measuring one inch in depth with only one and a half to two inches of soil.

Proper time to Plant and Best Position.—Information on this subject is given at the heading of each family. Amateurs frequently fail with many bulbous plants through planting at the wrong season, thinking that because September is the proper time to plant crocuses, all other autumn bulbs should be planted in the same month; whereas Tulips, Anemones, Ranunculi, Ixias, Sparaxis, Early Gladioli, etc., should not be planted before October or November.

Manure for Bulbs.—All bulbs object to the ammoniacal properties of fresh stable manure, consequently hot or fresh stable manure should never be used, but only well-decayed stable or cow manure, such as the material from an exhausted hot-bed. The safest manures for all bulbs growing outdoors is PHYTOBROMA (price 20/- per cwt.; 2/6 per 7 lbs.) or phosphatic basic slag (price 10/6 per cwt.; 1/- per 7 lbs.) for heavy soils, and crushed bones (price 14/- per cwt., 1/3 per 7 lbs.) for light and sandy soils. The PHYTOBROMA should be applied at the rate of 8 cwt. per acre, or 3 oz. per square yard, early in spring, when top growth is showing; phosphatic basic slag or crushed bones should be put in the ground with the bulbs at the time of planting, the former at the rate of 1 ton per acre, or 7½ oz. per square yard, and the latter at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and after planting, sprinkle on the surface of the ground sulphate of potash at the rate of 2 cwt. per acre or ¾ oz. per square yard (price 21/- per cwt., 1/9 per 7 lbs.). Where basic slag or crushed bones are used, PHYTOBROMA may also be given at the rate of 1½ oz. to the square yard in spring, when top growth is showing. On hot dry and sandy soils, old stable manure may with advantage be used, to act as a sponge to hold moisture in the soil; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs. Where bulbs are grown in quantity for cutting, plant them on a piece of ground off which a vegetable crop (potatoes by preference) has been taken. The previous manuring for the potatoes, and the working of the soil in lifting them, brings the ground into first-rate condition for bulbs, and no more manure is required.

For bulbs grown in pots 1 lb. of Phytobroma should be mixed with every bushel of soil, and a teaspoonful should be used as a surface dressing when the flower-buds are forming (*see page 92*).

Top Dressing.—Where possible, we advise a top dressing to all bulbs through the winter months with some light material such as long straw litter, cut heather, cut furze branches, etc., or cut fern bracken resting on pea sticks (cut fern used by itself lies too wet and is apt to rot the young growths). *The advantage* of this light covering is that it keeps the surface soil sweet by preventing the heavy autumnal rains from beating down the earth's crust; it also protects any early top growth.

Lifting and Replanting.—When bulbs are lifted they should not, if possible, be replanted on the same ground, but where other bulbs or plants have previously been growing; thus, where Tulips have been growing last season, plant Narcissi this autumn, and so on.

Culture for Spring-flowering Bulbs in Pots or Boxes.

Time of Potting.—From the middle of September to the middle of October is the best month for potting Spring-flowering bulbs.

The best compost to use is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand *and not passed through a sieve*, so as to retain in the soil as much old root fibre as possible), and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of bone meal or 1 lb. of Phytobroma (*see page 92*) to every bushel of soil, which mix well together before using. *Never pot in soil that is wet or sticky.*

The pots should be carefully washed or wiped clean before using. *Never pot in dirty or wet pots.*

Good drainage should be secured by placing three or more pieces of broken crocks over the drainage hole, placing the crocks with bevelled sides uppermost, and then covering with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with crocks, and a good layer of rough fibrous loam placed at bottom of box, or a layer of leaf soil to ensure perfect drainage.

Covering the Bulbs.—The larger bulbs should be only half covered with soil, the level of which should be half an inch below the rim of the pot, to allow of watering when the bulbs are in growth.

CULTURE OF BULBS IN POTS OR BOXES—*continued.*

After potting, stand the pots or boxes outside in the open, under a north wall by preference, on a firm bottom such as a bed of ashes or a gravel path to prevent the entrance of worms. Then cover with Cocoa Fibre, ashes, or old decayed leaf soil, pressing down the covering material in between the pots, which should be completely buried to a depth of 3 to 4 inches from the top. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots are plunged in the open they will require no watering.

The pots or boxes should remain plunged for a period of not less than twelve weeks, in order that the bulbs may get well rooted, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, and keep partially shaded for a few days, giving water gradually. Very weak liquid manure-water may then be given once a week until they come into bloom. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from an insufficient supply of light or air. On no account should bottom heat be given. A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed too early, before they have made a sufficient quantity of fibrous roots. They are then at once subjected to heat, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check from draughts to the young top growths.

Pot-Culture of Early Gladioli, Ixias, Sparaxis, Tritonias, Babianas, Calochorti, etc.

These bulbs start early into growth and therefore should not be potted up before the end of October to November. The pots should be plunged up to the rim only (not covered) in a cold frame, or under a south wall, for about three months, after which the treatment is similar to that for Spring-flowering bulbs.

Culture of Spring-Flowering Bulbs in Vases and Bowls.

Such as Hyacinths, Tulips, Daffodils, Crocuses, Sellas, Chionodoxas, Snowdrops, etc.

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by simply using our specially prepared **Fertilised Cocoa Fibre and Charcoal Mixture** (3s. 6d. per bushel, 1s. per peck); the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to potting soil for flowering Daffodils and other bulbs in fancy bowls and vases.

Three bulbs of *N. Queen of Spain* growing in a 4-inch "Doulton Ware" Vase.

drainage holes, thus saving the use of saucers.

They will be found most useful for growing Spring-flowering bulbs in, either for table decoration or the greenhouse. During Summer they may be used for table decoration planted with Pansies or such low-growing hardy flowers, or for standing little pot-plants in.

Barr's "Doulton-Ware" Bulb Vases (as illustrated):—2½ in. diameter, -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia., 3/- each.

Fancy Decorated Japanese Bowls:—5 in. diameter, -/10; 6 in. dia., 1/3; 7 in. dia., 1/9; 8¼ in. dia., 3/-; 9½ in. dia., 4/-; 10¾ in. dia., 6/-; 12 in. dia., 8/6 each.

Barr's Fertilised Fibre and Charcoal Mixture, for growing bulbs in Vases, Bowls, Jardinets, etc., 3/6 per bushel; 1/- per peck (bags free).

Culture.—Fill the vase or bowl with the Cocoa Fibre Mixture and plant the bulbs in the same manner as with ordinary potting soil; the larger bulbs should be about half covered, and the smaller ones only just covered. When potting, fill the vase with the mixture up to a little below the rim, so as to allow sufficient space for watering. Pot firmly. After potting, give sufficient water to make the whole moderately damp. The vases may be then either placed in a cold frame and plunged in cocoa fibre for twelve weeks, or they may be placed in a dark cupboard or cool airy cellar until they have made a few inches of top growth. They should then be placed in the window of a cool airy sitting-room or in a cool greenhouse close to the glass, and flowered in the same way as pot Hyacinths, being always kept as near to the glass as possible, and given sufficient light and air to prevent the foliage from becoming drawn. When the flower buds are advanced, they may be removed to a warmer temperature, such as a slow forcing-house or warmer sitting-room, still being given as much light as possible. No bottom heat must ever be given, neither should they be placed in too warm a temperature until the flower buds are well developed. Once the bulbs have started to make good growth, the mixture should be kept moist, but water must be given sparingly until the bulbs have made some inches of top growth.

SPECIAL FANCY VASES AND BOWLS for growing Daffodils and other bulbs in.

We have had special little fancy vases made for us by Messrs. Doulton for the above-named purpose. The vases are of elegant shape, of a neutral art drab shade, and without

Barr's Famous "Covent Garden"

Collections of Bulbs.

These Collections are not subject to Cash Discount, the prices being strictly nett. In the case of Prepaid Orders, however, we deliver the Collections Carriage Paid.

(After November 1 we may find it necessary to make slight changes in the Collections.)

(A) BARR'S 21/- COLLECTION of BULBS for FORCING.

Contains 309 Bulbs of fine quality, as follows :

12 Choico Named Hyacinths	25 Sweet-scented Single Jonquills	6 Single Tulip, Cottage Maid
12 Early White Roman Hyacinths	3 Daffodil Golden Spur	6 " " Keizerskroon
3 " Blush " "	3 " P. R. Barr	6 Double " Tournesol
3 " Azure " "	3 " bicolor Horsfieldii	50 Splendid (Named) Crocuses
6 Double Roman Narcissi	3 " Queen of Spain	25 Scilla sibirica
6 Paper White "Early Snowflake" Narcissi	3 " Telamonius plenus	50 Elwes' Giant Snowdrop
3 Polyanthus Narcissus "Grand Soleil d'Or"	12 " poeticus ornatus	12 Chionodoxa Lucillæ
3 " " Grand Monarque	12 Single Tulip, Early Scarlet, "Duc Van Thol"	12 " " sardensis
	6 " " Chrysolora	12 Allium neapolitanum
		12 Freesia mixed hybrids

(A) Barr's Collections of Bulbs for Forcing, 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

(B) BARR'S 21/- COLLECTION of BULBS for the GREENHOUSE, SITTING-ROOM, etc.

Containing 300 Bulbs of fine quality.

Arranged for those who prefer a few sorts only of easily cultivated Winter- and Spring-flowering Bulbs.

20 Choice Named Hyacinths	3 Daffodil Emperor	6 Single Tulip Van Vondel
6 Early White Roman Hyacinths	6 " bicolor Empress	6 Double " Tournesol
3 Polyanthus Narcissus Grand Monarque	3 " Queen of Spain	100 Splendid Crocuses (Named)
3 " " "Scilly Isles" White	3 " Telamonius plenus	25 Scilla sibirica
3 " " Grand Soleil d'Or	6 " poeticus ornatus	12 Chionodoxa Lucillæ
25 Sweet-scented Single Jonquills	6 Single Tulip Chrysolora	12 " " sardensis
3 Daffodil Golden Spur	6 " " Dusart	25 Elwes' Giant Snowdrop
	6 " " Princess Marianne	12 Milla uniflora

(B) Barr's 12/6 Collection of Bulbs for Greenhouse, etc.

Containing about half the quantity of Bulbs as in the 21/- Collection.

(B) Barr's Collections of Bulbs for Greenhouses, etc., 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

For directions as to potting and treatment of bulbs before they are brought into the greenhouse, or forcing-house, see page 1.

(C) BARR'S 21/- COLLECTION of BULBS for the FLOWER GARDEN,

Containing 600 Bulbs of fine quality, most suitable for outdoor decoration.

25 Hyacinths, Barr's Rainbow Mixture, Large-flowered	25 Single Tulips, Barr's Rainbow Mixture [Mixture]	12 Blue Grape Hyacinth
6 Polyanthus Narcissi	25 Double Tulips, Barr's Rainbow	10 Allium Moly, yellow
5 Daffodil Queen of Spain	50 Crocus, large yellow	25 Star of Bethlehem
5 " princeps [Bess]	50 " " blue	25 Wood Hyacinths, mixed
5 " incomparabilis Queen	50 " " white	18 Milla uniflora
5 " " Sir Watkin	50 Snowdrops	25 Summer Snowflakes
5 " Barrii conspicuus	10 Scilla sibirica	12 Fritillaria, mixed
5 " Leedsii amabilis	12 Chionodoxa Lucillæ	25 Spanish Irises, mixed
5 " poeticus ornatus	12 " " sardensis	12 English Irises, mixed
12 Jonquil Daffodil "Rugulosus"	24 Winter Aconites	50 Anemone, Large-flowered, Single, mixed

(C) Barr's 12/6 Collection of Bulbs for Flower Garden,

Containing half the quantity of the Bulbs enumerated in the above 21/- Collection.

(C) Barr's Collections of Bulbs for Flower Garden, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

(D) BARR'S "WOODLAND" 21/- COLLECTION of BULBS

For Naturalising in Woodlands, Orchards, Wild Gardens, &c.

Containing 800 suitable Bulbs of fine quality.

200 Daffodils, in 10 named varieties	50 Wood Hyacinths, mixed	12 Snakeshead Fritillaries
25 Cottage Tulips, mixed	75 Elwes' Giant Snowdrops	8 Camassia esculenta
50 Winter Aconites	25 Summer Snowflakes	6 Crown Imperials, mixed
50 Star of Bethlehem, white	25 Dog's-Tooth Violets, mixed	3 Lilium candidum (<i>Madonna Lily</i>)
25 Blue Starch Hyacinth	15 Blue Apennine Anemones	3 " croceum (<i>Orange Lily</i>)
150 Crocuses, mixed	50 <i>Milla uniflora</i> (<i>Triteleia</i>)	3 " pyrenaicum, yellow
	25 Allium Moly, yellow	

(D) Barr's 12/6 "Woodland" Collection of Bulbs,

Containing about half the quantity of the Bulbs enumerated in the above 21/- Collection.

(D) Barr's "Woodland" Collections of Bulbs, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

For hints on naturalising Bulbs and how to plant in grass without spoiling the turf, see pages 9 and 10.

(E) BARR'S "ROCK GARDEN" 21/- COLLECTION of BULBS

Consisting of charming little

Subjects for Naturalising on Rockwork, Banks, &c.,

where they will soon establish themselves and form a delightful picture.

For full descriptions, see body of Catalogue.

12 Allium Moly	6 Crocus hiflorus argenteus	6 Daffodil nanus
12 " neapolitanum	12 " Suslanus	12 Ornithogalum umbellatum splendens
6 " triquetrum	3 Corydalis hultbosa	6 Puschkinia libanotica compacta
6 Anemone fulgens	12 Erythronium dens canis, mixed	6 Romulea speciosa
12 " apennina	6 Fritillaria meteagris, mixed	12 Scilla sibirica
3 Bloomeria aurea	25 Galanthus Elwesii	12 " bifolia
12 Brodiaea grandiflora	6 Hyacinthus amethystinus	6 " hispanica
18 Chionodoxa Lucillae	3 Iris persica	6 " " alba
12 " sardensis	3 " reticulata	6 Sternbergia lutea
6 Crocus asturicus	12 Leucojum vernal	6 Tulipa persica
6 " sativus	12 <i>Milla uniflora</i>	25 Winter Aconites

6 " aureus striatus	6 " botryoides pallidum	

(E) Barr's "Rock Garden" 12/6 Collection of Bulbs,

Containing about half the quantity of Bulbs as in the 21/- Collection.

(F) BARR'S CHOICE "ALPINE GARDEN" 21/- COLLECTION of BULBS.

Consisting of choice little

Subjects in Bulbous Plants, suitable for the Alpine Garden.

3 Anemone stellata, "White Gem"	3 Crocus Suslanus	3 Daffodil Bulhocodium
3 " hlanda	3 " Tommasinianus	citrinum
3 " ranunculoides	3 Erythronium giganteum	3 " cyclamineus
3 " nemorosa hracteata fl. pl.	3 " Hendersoni	3 " minimus
3 " " Robinsoniana	3 Fritillaria armena	3 " triandrus albus
3 Brodiaea Murrayana	3 " aurea	3 Puschkinia libanotica
3 Calochortus, mixed (Butterfly Tulips)	6 Galanthus Ikariae	3 Romulea Clusii
3 " pulchellus	6 Hyacinthus amethystinus	3 Scilla sibirica taurica
6 Chionodoxa gigantea	3 Iris alata.	3 " " alba
3 Corydalis hultbosa	3 " reticulata	3 " verna
6 Crocus pulchellus	3 " Galatica.	3 " autumnalis japonica
6 " speciosus	3 " tuberosa.	3 Sternbergia lutea major
3 " zonatus	6 Leucojum vernal carpathicum	2 Tropaeolum polyphyllum
3 " Imperati	6 Muscari Heavenly Blue	3 Tulipa Clusiana
	6 " botryoides albus	3 " persica

(F) Barr's Choice "Alpine Garden" 12/6 Collection of Bulbs,

Containing about half the quantity of Bulbs as in the 21/- collection.

A Few Fine Novelties and Specialities

IN BULBS AND TUBERS, Etc., FOR 1906.

	each—s. d.
AGAPANTHUS	
St. Pauli , bearing on stems 2 to 2½ ft. high large umbels of pure white flowers about the size of <i>A. Mooreanus</i> ; a charming plant for pots or tubs, etc.	7 6
Weillighi , a handsome new species of African Lily , with fine heads of lavender-coloured flowers having indigo-blue line up the petals and a broad indigo-blue margin, ht. 3 ft.	4 6
AMARYLLIS	
Belladonna purpurea maxima , a remarkably beautiful <i>Belladonna Lily</i> , bearing handsome bold umbels of large soft rose flowers, 9 to 10 on an umbel, delicately hyacinth-scented; it flowers 2 to 3 weeks before the Belladonna Lily, ht. 3 ft.per doz.	16/- 1 6
ANEMONE	
apennina fl. pl. , a very pretty double-flowering form of this beautiful Anemone, flowers pale blue, fully double, lasting a long time, ht. ½ ft.per doz.	7/6 0 8
"St. Brigid," an extra fine strain, of these lovely Poppy Anemones, flowers very large, mostly semi-double, with finely divided petals, and of the most brilliant and varied shades of colour, all having a handsome blue-black central boss; very graceful in habit, ht. 1 ft.per 100, 10/6; per doz.	1/6 —
ANEMONE pulsatilla alba , a pure white variety of the beautiful Pasque Flower ; a charming plant to naturalise on rockworkper doz.	10/6 1 0
ARUM aristatum , a dainty little Dragon Arum with brilliant red spathe and blackish spadix, pleasantly scented; this Arum, like the <i>Monarch of the East</i> , may be flowered in a dry state without the aid of soil or waterper doz.	7/6 0 8
ASTILBE chinensis Davidii , a very handsome new Chinese hardy border perennial, producing large plumes of handsome rich crimson-purple flowers with violet anthers, ht. 3 to 5 ft. First-Class Certificate R.H.S., August 1902.per doz.	25/- 2 6
CALOCHORTUS Venustus—Eldorado strain , a new race of the lovely <i>Butterfly Tulips</i> of tall sturdy growth, from 1½ to 2 ft. in ht., flowers varying greatly in shade—from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon, all having the centre exquisitely blotched and speckled soft brown and golden-yellow, while some have a beautiful golden blotch on each petal. Award of Merit R.H.S. (<i>For full Cultural Notes and Illustration see page 18.</i>) Mixed Beautiful Shades, in great variety.per 100, 12/6; per doz.	1/9 —
COLCHICUM giganteum , a grand Meadow Saffron from the Zigana Dagh (Gipsy Mountain), bearing immense expanded flowers of a beautiful soft rose shading to white at base, remarkably handsome. (<i>See coloured plate in "Flora and Sylva," June 1903</i>)per doz.	16/- 1 6
CYCLAMEN	
New Large-flowered Crested Varieties , flowers remarkably beautiful, all having an elegant feathered crest. Colours white, rose, mauve, and white with rose eye each variety, per doz. 24/- & 30/-; each 2/3 &	2 9
New "Papilio" or Butterfly Cyclamen , a very beautiful race; flowers large and graceful; all elegantly fringed. Colours white, rose, red, mauve, and white with rose eye each variety, per doz. 24/- & 30/-; each 2/3 &	2 9
CYRTANTHUS	
angustifolius grandiflorus , the <i>finest of all the Cyrtanthi of the Monella section</i> , and a handsome greenhouse plant for autumn flowering; it produces spikes 1½ to 2 ft. high, bearing umbels of 12 to 15 flowers, of a brilliant orange-scarlet	5 6
Marian , an elegant hybrid between <i>C. lutescens</i> and a form of <i>C. angustifolius</i> , producing freely spikes a foot long, bearing fine heads of curved flowers yellow and bright red; a fine greenhouse plant. Award of Merit R.H.S., April 5th, 1904	3 6
DEUTZIA gracilis carminea , a remarkably pretty new variety, flowers being of a delicate rose with deep carmine reverse	1 6
ERYTHRONIUM californicum (syn. giganteum) , a remarkably graceful and beautiful American Dog's Tooth Violet. (<i>See page 27 for description</i>)per 100, 10/6; per doz. 1/6	0 2
" " " " <i>A few very large roots</i> " " 30/-; " " 4/-	0 5
"White Beauty," a lovely new variety of <i>E. giganteum</i> , bearing freely large creamy white flowers of good substance, with yellow central zone, foliage the most richly mottled of all the Erythrוניםper 100, 17/6; per doz.	2/6 0 3
EURYCLIS Cunninghamii (The Brisbane Lily) , a handsome stove or warm greenhouse bulbous plant allied to the <i>Panacratium</i> , with handsome broad foliage and large heads of pure white flowers, ht. 1 ft. Pot up in February and place in bottom heat, giving abundance of water while the plants are in growth.per doz.	21/- 2 0

- FREESIA Armstrongi**, the **Pink Freesia**, flowers pretty bright rosy carmine with white centre and yellow throat, very free flowering.....per doz. 42/- each
s. d
4 0
- Chapmanii**, a beautiful new hybrid Freesia, a cross between *F. aurea* and *F. refracta alba*, bearing flowers nearly the size of *F. refracta alba*, and varying from primrose to canary with golden shading and brilliant orange blotch, delicately fragrant 3 6
- refracta alba**, The true **Pure White variety**, bearing sprays of deliciously scented snowy white flowers, highly prized for cutting, 1 ft. (*The bulbs of this variety are a little smaller than the common F. refracta, but they produce more bloom and give greater satisfaction*).....per 100, 6/6; per doz. 1/- —
- Tubergeni** (*F. refracta alba*, true, × *F. Armstrongi*), a lovely new hybrid with flowers the size of *Freesia refracta alba*, of a delicate rose-lilac shade with white throat and base of tube bronzy gold, deliciously scented 5 6
- GERBERA Jamesoni** (**Barborton Daisy**), a very handsome plant from South Africa, bearing large showy flowers, resembling giant daisies, colour fiery orange-scarlet. Suitable for very hot sheltered sunny gardens, or may be grown as a cool greenhouse plant. per doz. 25/- & 36/-; 2/6 & 3 6
- GLADIOLUS princeps**, the largest-flowered and perhaps the most showy Gladiolus ever raised. The flowers are of great size, very open, and beautifully formed, colour brilliant deep scarlet with white stripe down centre of petal; remarkably effective in the flower-border per doz. 15/- 1 6
- GLORIOSA Leopoldi**, a fine new **Glory Lily** from the Congo, producing an abundance of beautiful self-golden-yellow flowers; a grand stove climber 10 6
- HELONIOPSIS breviscapa**, a charming little plant introduced by us from Japan, producing out-of-doors in February and March sturdy little spikes 4 in. high studded with dainty white flowers passing off rose; it delights in a half-shady situation. **Award of Merit R.H.S.** See coloured plate in "The Garden," July 22nd, 1905 2 6
- HEPATICA**
- Double White**, a rare and beautiful variety with pure white very double flowers. **First-Class Certificate R.H.S.** 5 6
- Double Blue**, a favourite old garden plant, but scarce 1 6
- HYMENOCALLIS amancæ**, the **Golden-Yellow Peruvian Daffodil**, a rare and handsome greenhouse bulbous plant, ht. 1½ to 2 ft. 3 6
- INCARVILLEA Delavayi**, a lovely hardy Chinese plant with gracefully cut foliage, and producing in early summer sturdy spikes of large Gloxinia-like flowers ranging from brilliant rose to rose-carmine, with golden-yellow throat, ht. 2½ to 3 ft. It likes a sunny situation per 100, 55/-; per doz. 7/6 0 8
- grandiflora**, flowers a little larger than those of *I. Delavayi* and deeper in colour, deep rose to carmine with golden-yellow throat, beautiful, ht. 2 ft. 4 6
- IRIS**
- galatica**, a very pretty species allied to *Iris persica*, having silvery grey standards shaded porcelain and falls blotched purple; charming on rockworkper 100, 21/-; per doz. 3/- 0 4
- lupceng**, a handsome hybrid raised by Sir Michael Foster from *I. lupina* and *I. Cengialti*, flowers large with lavender-purple standards and falls, elegantly waved at margin 2 6
- Monspur**, beautiful new tall hybrid Irises, specially adapted for the water's side. See page 46.
- pur-sind**, a pretty free-blooming hybrid of *I. persica purpuræ* and *I. Sindjarensis*, producing dwarf plants covered with rosy purple flowers shaded blue, ht. 4 to 5 in.; charming in pots or on rockwork...per doz. 15/- 1 6
- sibirica Blue King**, a very handsome new variety from Japan, having large and well-formed flowers of a fine clear blue, free bloomer and equally good for flower border or water's side, ht. 3 ft.per doz. 7/6 0 9
- sibirica Snow Queen** an exquisite new hardy Iris, flowers of a snowy whiteness large and well formed, produced in great abundance, foliage light and graceful, ht. 3 ft.; a gem for flower border or water's side. **Award of Merit R.H.S., June 24th, 1902**.....per doz. 15/- 1 6
- persica Heldreichi** (*syn. stenophylla*), the most beautiful of the *Persica* section of Irises. The flowers are of a lovely lavender shade, with velvety violet falls reticulated white on the upper part, and with yellow crest, ht. 4 in. **First-Class Certificate R.H.S.** This lovely Iris should be freely grown in pots and pans for indoor decoration, as well as in the rock garden, associated with the Winter Aconite, etc. per doz. 7/6 0 8

IRIS PERSICA HELDREICHI
(Much reduced).

IRIS—*continua*.

NEW REGELIO-CYCLUS IRISES, a lovely new race of Irises, being the result of crosses between the Regelia and Oncoeyclus sections. They caused a great sensation at the Royal Horticultural Society's Show, May 17th, 1904, where several were awarded certificates. These Irises have proven to be of easy culture.

- Artemis**, large flower, with bold standards of a violet-purple profusely veined, falls densely lined violet-purple on white, and having a dark velvety blotch. **1st-Class Certificate R.H.S.** 10 6
- Charon**, the finest of all, having a large handsome flower with standards elaret-brown shaded bronzy yellow at margin, falls finely lined velvety brown on a bronzy yellow ground. **First-Class Certificate R.H.S.** 7 6
- Eos**, standards light purplish rose, falls shaded and reticulated velvety brown on a cream-coloured ground. **Award of Merit R.H.S.** 6 6
- Hecate**, flower large, standards pale purple, finely lined, falls beautifully reticulated on a cream-coloured ground and heavily shaded velvety reddish brown. **Award of Merit R.H.S., May 15th, 1906.** 5 6
- Iphigenia**, large broad standards, bright purple with fine dark lines, falls heavily shaded and veined velvety brown-purple on a creamy ground, blotched velvety purple-black. **First-Class Certificate R.H.S.** 8 6
- Penelope**, standards silvery pale purple finely reticulated, falls deeply veined purple on a white ground, large and very beautiful 6 6
- Psyche**, flower large and beautiful, finely lined purple on a cream-coloured ground and with a velvety crimson-black blotch. **Award of Merit R.H.S.** 8 6
- Thalia**, standards and falls beautifully veined violet on a white ground, and having a dark velvety purple blotch and beard 6 6

LACHENALIA "Cowslip," a very handsome new Lachenalia raised by an amateur in Australia. It produces a fine spike of large rich golden bells with rosy scarlet shading at top, while the expanded mouth is deeply margined maroon, foliage broad, stem spotted maroon, very pretty, ht. 9 in. 15 0

LILIUM

- auratum giganteum**, a giant form of *Lilium auratum platyphyllum*, bearing grand spikes of very large flowers with broad white petals spotted crimson, foliage broad and handsome, ht. 6 to 10 ft. *strong bulbs*, p. doz. 30/-; *extra strong bulbs*, p. doz. 38/-; ea. 2/9 & 3 6
- candidum (The Madonna Lily)** *a few monster bulbs*, per 100, 55/-; per doz. 7/6 0 8
- " " " *very large bulbs* " 35/- " 5/- 0 6
- candidum speciosum**, a remarkably robust-growing variety, with very thick blackish purple stems well clothed with foliage, growing 5 to 6 ft. high, and bearing about 20 to 25 flowers, sometimes more. It blooms later than the ordinary *L. candidum*. A very handsome Lily for borders, *scarce*..... *strong bulbs*, per doz. 12/6 1 3
- longiflorum, from the Azores**, producing very freely long handsome trumpet-shaped flowers of a snowy white, of graceful habit, ht. 3 ft.; a splendid Lily for early forcing. *Bulbs supplied from September to November* per doz. 12/- 1 3
- pardalinum Burbank's Hybrids**, very fine hybrids raised by Mr. Luther Burbank between *L. pardalinum* and *L. Humboldti*, producing robust-growing plants with heads of handsome flowers varying from clear orange to orange with crimson tips, all beautifully spotted per doz. 25/- 2 3
- pardalinum "Red Giant,"** a remarkably fine new Lily selected from hybrids raised by Mr. Luther Burbank; it is a very strong grower, bearing in July heads of blood-crimson flowers shaded red towards centre and profusely spotted dark maroon, remarkably effective... 5 6

LISSOCHILI from the Transvaal, beautiful terrestrial orchids collected on the open veldt in the Transvaal, and comprising different varieties, white and rose, yellow, and intermediate tints, all beautiful. Culture as for Nerines is recommended, the roots being kept dry except when in growth..... *Fine tufts*, per doz. 30/- 2 9

MONTBRETIAS—Beautiful New Hybrids, most elegant border or pot plants, bearing in August spikes of most gorgeously coloured flowers. (For general collection see page 60)

- Anneau d'Or**, bearing grand broad-petalled flowers measuring over 2 inches across, brilliant orange-yellow with velvety purple base and light yellow centre, buds rich dark red 2 6
- Congo**, flowers a very rich dark orange-red, remarkably handsome, per 100, 35/-; per doz. 5/- 0 6
- Lothario**, flowers a very brilliant apricot-yellow with orange-red, bright and attractive 2 0
- Tragédie**, perhaps the darkest coloured of all Montbretias and remarkably effective, flowers broad petalled, rich deep orange, the lower half maroon-purple, buds almost black shaded orange at apex, ht. 2½ to 3 ft. 2 6

MUSCARI

- "Heavenly Blue,"** the most beautiful of all Starch and Grape Hyacinths, and one of the loveliest blue flowers of spring *Extra large bulbs*, per 100, 8/6; per doz. 1/3 —
- Masseyanum**, a very distinct new **Tassel-Hyacinth** with bright rosy coloured flowers... 2 6

NERINE

Bowdeni, a new species from Cape Colony, and the finest of the section. It bears large umbels of flowers 3 to 4 inches across; pink with a dark rose-coloured line running down each petal. **Award of Merit R.H.S.** 7 6

NERINE—*continued.*

	each.—s.	d
flexuosa alba , a rare and beautiful bulbous plant, bearing an umbel of about twelve snowy white flowers, with elegantly undulated and recurving petals, ht. 2 ft.; a fine subject for pot-culture in cool greenhouse, or to plant out of doors under a south wall. Awarded a Botanical Certificate R.H.S., October 21st, 1902	per doz.	30/-
marginata , a beautiful showy species from the south-western part of Cape Colony, bearing an umbel of 10 to 20 bright scarlet flowers; a fine greenhouse plant	per doz.	36/-
pancratioides , a remarkable species from Natal, with long slender leaves and tall spikes of bluish-white flowers with rudimentary corona		3 6
Beautiful New Hybrids of rare crosses, and varying in colour from pink to dark crimson, ht. 18 in.	per doz.	2 9
RANUNCULUS, Single Scarlet from Palestine , a beautiful single-flowered variety found wild in Palestine and bearing brilliant scarlet flowers; a very showy plant for beds and flower borders	per 100,	7/6; per doz. 1/3
RICHARDIA Mrs. Roosevelt , a handsome new variety with flowers as large as <i>Elliotiana</i> , but of a beautiful delicate pale primrose, with yellow spadix and slight violet blotch in centre, foliage rich deep green freely blotched silvery white, a strong grower. Award of Merit R.H.S., July 10th, 1906	Large roots	2 6
SPIRÆA Aruncus Kneiffii , a very graceful new variety of the Goat's Beard , with elegant finely divided foliage and plumes of dainty white flowers; it has not the very strong rampant habit of other Spiræas, and should only be planted in the choicer parts of the garden, ht. 2 ft.	per doz.	15/-
THALICTRUM Delavayi , a lovely new Meadow Rue from China, with dwarf Maidenhair-Fern-like foliage, from which rise slender spikes with panicles of soft lilac-blue flowers, ht. 2 ft. Award of Merit R.H.S.		2 6
TULIPS—New Cottage Tulips and species. Mostly May-flowering.		
Beauty , flowers rich golden-yellow, lightly flamed red at margin, anthers black, very showy, ht. 18 in.	per doz.	5/6
Ellen Willmott , a beautiful new Tulip with large and very long flowers of elegant form, delicate canary-yellow, shaded chrome on the outer petals; good for forcing.....	per doz.	17/6
Feu Ardent , large bold flower, dark glossy orange-scarlet shading to maroon, very handsome, ht. 18 in.		2 6
Fosteriana , a grand Tulip from Bokhara, having immense flowers of a gorgeous glowing scarlet, with centre either yellow or yellow and maroon. First-Class Certificate, May 1st, 1906		1 6
Inglescombe Yellow , may be called a Yellow Darwin Tulip , large globular flowers of perfect form of a glossy canary-yellow, a remarkably beautiful flower, ht. 18 in. Award of Merit R.H.S., May 15th, 1906.....	per doz.	18/-
Kroeschel , very large handsome globular flower, dark scarlet, heavily flamed golden-yellow and orange-red, ht. 20 in.	per doz.	10/6
Louis XIV. , globular flower of immense size, with broad petals rich purple heavily flushed at margin a golden-bronze, inside golden-bronze shading to bronzy purple, very tall and stately; a remarkably handsome flower	per doz.	32/6
Mrs. Kerrell , a flower of elegant form with pointed petals, the three outer ones slightly reflexing, colour a beautiful light rose with delicate amber tinge, centre white bordered electric-blue, <i>very scarce</i>		3 6
Primrose Beauty , a very beautiful new Cottage Tulip, with elegantly formed flowers, opening a delicate soft primrose and passing off a cream colour, delicately scented like Tea Roses; forces well	per doz.	8/6
Quaintness , large handsome long flowers, inside shaded mahogany on a dark golden ground, outside flushed deep rose, very distinct. Award of Merit R.H.S., 1905		5 6
Rose Beauty , handsome broad foliage and large bold flowers with broad petals, rich brilliant rose with large snowy white centre margined rich blue, very striking, ht. 35 in.....	per doz.	24/-
Rose Dorée , flower of elegant pitcher form, rose shading to orange and amber, presenting quite an art shade, delicately scented	per doz.	21/-
Salmon Prince , a very beautiful Tulip with fine globular flowers, apricot-orange, shaded gold, very showy, ht. 24 in.....	per 100,	75/-; per doz. 10/6
Scarlet Emperor , a very fine bold flower of a brilliant glowing scarlet, with rich clear yellow centre and black anthers. First-Class Certificate R.H.S., May 17th, 1904. per doz. 21/-		2 0
Turenne , a flower of immense size, purple broadly margined amber, inside amber shaded reddish brown, very stately, ht. 25 in.	per doz.	10/6
Walter T. Ware , a grand Tulip and the richest deep golden of all, flowers globular, with broad petals, the three outer ones reflexing at the top, very beautiful. A wonderful lasting Tulip, ht. 18 in. Award of Merit R.H.S., May 15th, 1906, <i>only a few bulbs for sale</i>		15 0
Water Lily , a tall handsome Tulip with very large solid white flowers with spreading petals, resembling a <i>Water Lily</i> , scarce		2 6
Yellow Emperor , pure yellow flowers developing to a great size, with broad petals, the three inner ones globular, outer ones reflexing, delicately scented	per doz.	21/-
TULIP, Early Single "Brilliant Star," a grand showy early Tulip; flowers rich dazzling scarlet with large yellow centre marked black, ht. 12 in.....	per doz.	18/-

Hardy Bulbs and Plants.

For extensive planting in Shrubberies, Wild Gardens, Woodlands, Grass Lands, etc.

MUSCARI "HEAVENLY BLUE" ESTABLISHED ON A HEDGE BANK AT OUR SURBITON NURSERIES.

A Few Remarks on Naturalising Bulbs in Grass, etc.

This fascinating phase of gardening deserves more attention than has hitherto been bestowed upon it. No sight is more delightful than the fresh brightness of spring-flowers growing freely in grass land or lending colour to woodland walks, hedgerows, and ditches, here and there nestling at the foot of trees, or establishing themselves on sloping banks.

For naturalising in grass spring flowers are especially suitable, as they bloom and are over before the grass grows tall enough to hide their beauty. Amongst our spring-flowering bulbs there are many gems which refuse to grow in cultivated borders, but when planted in grass, where they enjoy a cooler and more even temperature, they soon become established, and multiply freely until a regular colony is formed which greatly adds to the charm of the landscape.

All formality of arrangement should be avoided, the bulbs being scattered freely from the hand and planted where they fall. Large irregular breaks of one kind of bulb should be made in order to obtain the finest effect.

In planting under trees select spots where the soil is deepest and where the drip is least.

Those whose gardens are of limited size might make them very beautiful in spring, by utilising the fringes of their lawns and any grassy mounds or shady shrubbery walks for such spring favourites as Daffodils, Anemones, Scillas, Crocuses, Chionodoxas, etc., reserving the borders for summer- and autumn-flowering herbaceous plants.

In large gardens and parks ample opportunities are afforded for naturalising spring-flowering bulbs, and very beautiful results may be attained in this way.

In planting bulbs *in grass* **Barr's Bulb Planter** (*see page 91*), should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting-place for the bulb while by its use *the grass is not in the least disturbed*. Planting should not take place while the ground is hard, but after the first autumn rains.

BULBS AND PLANTS FOR EXTENSIVE PLANTING—continued.

Among the many gems which lend themselves to wild gardening and naturalising, we would specially mention the following :—

- Wood Anemones** (see page 14), including the exquisite *Anemone Robinsoniana* and the deeper blue and slightly taller *Anemone apennina* and *blanda*; one must see these lovely flowers nestling in grass or against the roots of large trees, to appreciate them fully.
- Alliums** (page 12). Amongst these we would mention *Allium Moly*, with its bright yellow flowers, thriving anywhere; also the graceful little *Allium neapolitanum*, so useful for shady corners.
- Anthericums** (page 10), very graceful and decorative in grass.
- Asphodelus luteus** and **ramosus** (page 11), two fine plants for naturalising in grass.
- Ornithogalums** (page 64), flowering freely anywhere, and producing a very beautiful effect when dibbled in on banks and blended with Tulips, Muscaris, etc.
- Tulips.** These may often be naturalised on banks where, in the same locality, if planted on the level they die out. *Tulipa sylvestris* and the dainty little *Tulipa persica* may be naturalised almost anywhere; the **May-flowering Cottage Tulips** (page 78) should be freely used for naturalising, especially *Picotee*, *Parisian Yellow*, *macrospila*, *Gesneriana*, *Bouton d'or*, etc. Plant at least 6 to 9 inches deep. All Tulips thrive best in partial shade and where sheltered from keen winds.
- Wood Hyacinths (Late Scillas)** (page 68) should be planted freely in shady walks; they soon make themselves at home and seed plentifully, with the result of much beautiful variation in form and character. Under pine and fir trees they may be naturalised with success.
- Fritillaries** (page 28). The purple and white Snakeshead Fritillaries (*F. melagris*) are found growing wild in a few districts in England, and thus seen form a charming picture, full of grace and beauty. For shady corners they will be greatly appreciated, also when naturalised in grass.
- Dog's Tooth Violets (Erythronium dens-canis,** page 26) are lovely little subjects for shady places where the grass is not too rank.
- Crocuses.** In grass the bright fresh colours of spring Crocuses contrast charmingly with their carpet of green. The beauty of *C. speciosus* (page 24) in September must strike every observer, while *C. Tommasinianus* (page 24) produces a lovely effect in February and March.
- Chionodoxas** (page 20) are amongst the most beautiful of early blue flowers, and should be largely used where the grass is kept short and not allowed to grow too coarse. *C. Lucille* and *sardensis* are followed by the beautiful *C. grandiflora* and *Tmolusii*.
- Scillas, early-flowering,** such as *sibirica*, *sibirica alba*, *bifolia*, *amena*, etc., all charming little subjects for naturalising.
- Muscari** (page 61) "**Heavenly Blue**" may be termed the **QUEEN OF BLUE FLOWERS**; for a distant effect, massed on grassy banks or grouped for colour, it has no equal. *M. botryoides cæruleum* and its varieties, flowering earlier than *Heavenly Blue*, are also charming little subjects to naturalise.
- Daffodils.** For these favourite flowers, we refer readers to our **Daffodil Catalogue**.

System of Planting, Arranging, etc.

In the grouping of Bulbs for naturalisation avoid anything approaching formality, and let the arrangement be a free and unconventional one. A good plan is to scatter the bulbs loosely from the hand and plant them where they happen to fall, thus forming irregular sweeps and breaks of colour here and there.

THE SYSTEM OF PLANTING.—For planting bulbs in grass we have had a **Bulb Planter** specially made, and by its use much time is saved and the turf is not spoiled. *Particulars* as to its use are given on page 9. In shrubby borders and in hard ground our special **Bulb Dibber** should always be used, the planting taking place after the first autumn rains; a hole is made the requisite depth, some fresh soil put in, and then the bulb inserted, after which the hole is filled up.

IN SELECTING POSITIONS the first consideration should be what best suits the subjects to be planted; too often shade-loving plants are found struggling for existence in full sun, and *vice versa*. In the following pages at the heading of each family we indicate as far as possible its cultural requirements. In planting beneath trees select spots where the soil is deepest and the drip least, which means avoiding the main branches or arms.

CUTTING OF GRASS.—It is advisable that this be done as late in September as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Spring-flowering bulbs in no way affect the hay crop, which may be cut at the usual season.

§ indicates those flowers which will thrive in shady places, under trees, on shady banks, etc., or may be planted in the open border.

* indicates those bulbs, etc., which are essentially wood plants, and should only be grown in shady situations.

BULBS AND TUBERS,

FOR ALL SEASONS AND CLIMATES.

ALPHABETICALLY ARRANGED FOR EASY REFERENCE.

In the following pages we give descriptions, as far as space permits, of the various Bulbs, etc., with general notes as to their cultural requirements. The larger illustrations are mostly reproductions, on a greatly reduced scale, of photographs taken at our **Surbiton Bulb Nurseries**.

Great care is taken in the selecting of our Bulbs, these being drawn from the **best bulb farms only**. High-class Daffodils and Tulips, etc., also many little rare and beautiful bulbous plants, *we are ourselves large growers of*.

Those bulbs and tubers marked thus × ripen late and are sent out from the middle of October to March. All other bulbs, etc., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, etc., will be executed therefore in two parts.

- × **ABOBRA viridiflora**, an elegant half-hardy perennial *scarlet-fruited* climber; plant outdoors in Spring and lift the tubers in Autumn, storing them in dry sand in a cool place away from frostper doz. 5/6 0 6
- × **ACHIMENES**, these make charming pot-plants for the greenhouse, and are very decorative with their brilliantly coloured elegant flowers; pot in rich light soil in Spring and start in a gentle bottom heat.
- 3 each of 8 distinct varieties, 8/-; 1 each of 8 distinct varieties, 3/-
Beautiful Hybrids, mixed, containing a great variety of charming colours
- per 100, 12/6; per doz. 1/9 —
- tubiflora** (*syn. Dolichodeira*), a valuable but little known pot-plant for greenhouse, bearing trusses of long tubular white flowers which have a delicious fragrance ...per doz. 5/6 0 6
- ACONITE—Winter.** See *Winter Aconite*.
- AGAPANTHUS (African Lily)**, valuable subjects for growing in tubs and pots, either for greenhouse or summer decoration in porches, on verandahs, terrace walks, and lawns, etc. They are also very effective planted out by streams, lakes, and ponds. During severe winters they should be covered with light litter or long manure, or in very cold climates lift the tubers in October and store in dry soil, replanting them in March. This plant is a gross feeder, and likes a rich soil with plenty of moisture while in growth.
- umbellatus**, handsome umbels of blue flowers, ht. 3 ft.per doz. 5/6 0 6
- ” **flore-pleno**, a very handsome variety with fine double blue flowers, ht. 3 ft.per doz. 10/6 1 0
- ” **albus**, producing handsome umbels of flowers ranging from white to white shaded blue, ht. 3 ft.per doz. 7/6 0 8
- ” **fol. variegatis**, foliage handsomely striped, flowers light blue, ht. 3 ft. 1 6
- ” **Mooreanus**, small blue flowers in graceful umbels, ht. 2 ft., per doz. 5/6 0 6
- ” **St. Pauli.** See *Novelty List, page 5*.
- ” **Weillighi.** See *Novelty List, page 5*.
- × **ALBUCA**, handsome Cape bulbs flowering in June; plant out of doors under a south wall in Spring, and lift the bulbs in Autumn, or pot up in Autumn for greenhouse culture.
- canaliculata**, having handsome trusses of almond-scented *golden-yellow* flowers, ht. 1½ ft.... 2 6
- fastigiata**, producing handsome trusses of *white and green* flowers, ht. 1½ ft. per doz. 6/6... 0 7
- Nelsoni**, a lovely species, producing handsome spikes of almond-scented pure white flowers, with brown stripe down petal (under glass *pure white*), ht. 3 ft. per 100, 40/-; per doz. 5/6 0 6
- ALLIUM**, a decorative and showy family of hardy Spring- and Summer-flowering bulbs, valuable alike for borders or rockwork and for naturalising in woods, etc. *A. neapolitanum* is easily forced, and the cut blooms are extensively used for vases and table bouquets.
- acuminatum**, with beautiful soft rose-lilac-coloured flowers in umbels, ht. 1 ft., per doz. 1/6 0 2
- azureum**, handsome intense blue flowers, quite hardy, ht. 2 ft. ,, 2/6 0 3
- cyaneum**, bearing innumerable clusters of pretty deep blue flowers, charming for rockwork and Alpine gardens, ht. ½ ft. established tufts 1 6
- descendans**, heads of dark red-purple flowers, ht. 2 ft.per 100, 15/-; per doz. 2/3 0 3
- Erdelii**, a handsome new species, bearing a head of large white flowers with crimson-black centre, ht. 12 in.per doz. 10/6 1 0
- karataviense**, a remarkably handsome plant, with very large broad glaucous-green foliage spreading close to the ground, and large globular heads of reddish lilac flowers, ht. ½ ft. per 100, 12/6; per doz. 1/9 0 2
- libani**, having umbels of small blush-white flowers, very distinct, ht. 3 to 4 in. ,, 8/6 0 9
- Moly (Golden Garlic)**, showy bright yellow flowers in large handsome umbels, valuable for flower borders and naturalisation, ht. 1 ft.per 1000, 25/-; per 100, 2/9; per doz. 5d. --

ALLIUM—continued.

each—s. d

neapolitanum, an elegant bouquet flower largely grown for the market, producing numerous heads of graceful white flowers; it is a charming plant to naturalise in shady woods, associated with the Wood Hyacinth, ht. 15 inchesper 100, 3/6; per doz. 6d. —

Ostrowskianum (*syn. oreophyllum*), a charming species from Asia Minor, with large heads of beautiful rose-coloured flowers, valuable for the rock garden and flower border, ht. ½ ft.per 100, 3/6; per doz. 6d. —

pedemontanum (*syn. narcissiflorum*), rose-purple, drooping bell-shaped flowers in clusters, beautiful and very distinct, ht. ¾ ft. AWARD OF MERIT R.H.S. 1901...per doz. 10/6 1 0

pulchellum, graceful heads of bright rosy purple flowers, in July, ht. ¾ ft. per 100, 32/6; per doz. 4/6 0 5

„ **flavum**, small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering, ht. ¾ ft.per doz. 3/6 0 4

Rosenbachianum, producing large round heads of purple-rose flowers, ht. 2½ ft. per doz. 3/6 0 4

roseum, bearing umbels of bright rose-coloured flowers, ht. 1 ft.,... per 100, 5/-; „ 9d. —

Schuberti, a very curious species, having star-like flowers of a rose-lilac shade, radiating from the top of the stem on petioles, varying from 4 to 9 in. long, giving the plant a unique appearance, ht. 1½ to 2 ft.....per doz. 5/6 0 6

triquetrum, white, striped green, pretty drooping umbels, ht. 1 ft., per 100, 12/6; „ 1/9 0 2

zebedanense, producing umbels of pure white flowers on slender erect stems, in May, ht. 1½ ft.per 100, 21/-; per doz. 3/- 0 4

× **ALSTRÖMERIA**, these beautiful “**Peruvian Lilies**” are easy to cultivate, and produce in Summer abundance of showy attractive flowers, which last long in water when cut. They like a well-drained light soil and a sunny situation. *Aurantiaca*, *chilensis*, and *lutea* produce a most brilliant effect in the flower border. Plant with the top 4 inches below the surface, by preference close to a south wall or hedge, and protect, the first Winter, with leaves or litter. *A. pelegrina*, *A. pulchra*, and *A. revoluta* are more tender, and delight in hot dry sunny situations, such as under a south wall, and require protection each winter; they also make fine plants for a cool greenhouse.

aurantiaca (*syn. aurea*), flowers ranging from rich orange to orange-red, spotted carmine, very showy and valuable for cutting; it should be grouped in every herbaceous border, ht. 3 ft.per 100, 10/6; per doz. 1/6 0 2

chilensis hybrida, mixed, beautiful shades of rose, crimson, orange, yellow, buff, and blush, with yellow and crimson markings, ht. 2 ft.per 100, 7/6; per doz. 1/3 0 2

Erebaulti, bright rose with green markings, interior of flower conspicuously flaked blood-crimson on a blush ground, ht. 2 ft.per doz. 7/6 0 8

lutea, bright yellow flowers spotted carmine, very pretty, ht. 3 ft. ...per 100, 8/6; „ 1/3 0 2

pelegrina alba, white, very chaste and beautiful, ht. 1 ft..... „ 21/-; „ 3/- 0 4

„ **rosea**, flowers rose, beautifully spotted, ht. 1 ft..... „ 21/-; „ 3/- 0 4

psittacina (The Parrot Flower), flowers bright crimson, splashed green and mahogany, ht. 2 ft.per 100, 8/6; per doz. 1/3 0 2

pulchra (*syn. tricolor*), flowers white and yellow, blotched crimson, ht. 1 ft. per 100, 15/-; per doz. 2/3 0 3

revoluta, a handsome variety, producing large heads of orange-red flowers per 100, 30/-; per doz. 4/- 0 5

× **AMARYLLIS (Hippeastrum), choice Greenhouse Varieties.** These are magnificent in the conservatory, and with management may be had in bloom for many months.

CULTURE.—Pot up the bulbs from December to March, and plunge the pots to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf-growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat they do well in an ordinary greenhouse or sunny sitting-room window if potted up in February.

Barr's Choice Unnamed Hybrids, purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beautyper doz. 25/-; each 2/3

ANEMONE Fulgens, The Beautiful Starry Windflower of the Pyrenees, etc. This, with its rich *dazzling scarlet* flowers, and light elegant growth, is the most brilliant and graceful of all Winter- and Spring-flowering Anemones, and should be used largely in wild gardens, orchards, woodlands, on banks, etc. The cut flowers are invaluable for table bouquets or vases, as they last a long time in water. If planted early in Autumn, flowers may be gathered, weather permitting, from Christmas; its hardiness is beyond all question, and the roots may be safely planted any month from August to February, in a position protected from ground winds and with a sunny or S.W. aspect.

Anemone fulgens likes a well-drained rich soil (rather dry by preference). Never plant the roots while the ground is wet.

fulgens, flowers beautiful rich dazzling scarlet with blue-black central boss, ht. $\frac{3}{4}$ ft.

ANEMONES, Various Beautiful Species for Autumn Planting. Where

ANEMONE BLANDA.

Daffodils are naturalised the following Anemones should be freely planted:—

Anemone apennina, the blue Mountain Windflower, forms a dense cushion of rich blue, and is one of the loveliest of dwarf Spring flowers. *A. blanda* resembles *A. apennina* in flower, but blooms a month earlier. The varieties of *Anemone nemorosa* (the true Wood Anemone) literally carpet the ground with their charming flowers; being shade-loving plants, they should be planted under trees or in shady nooks on rockwork; while naturalised in grass they present a picture full of grace and beauty. *A. nemorosa Robinsoniana* is remarkably beautiful. All are exceedingly charming established on rockwork, or as pot-plants. *A. palmata* likes a damp spot during summer. For other beautiful Anemones, see our *Hardy Plant Catalogue*.

ANEMONES—Various Beautiful Species—*continued.*

 - New Large-flowered Double Marbled Begonias,** a very beautiful novel strain, having large double well-formed flowers of rose-pink and red shades marbled white... 2 6
 - New Double Begonia, "Lafayette,"** a grand bedding variety, forming plants of erect habit with dark foliage and covered with very double brilliant scarlet flowers, per doz. 9/- 0 10
 - New Bedding Begonia, "Bavaria,"** a lovely little variety for pots or bedding, producing an abundance of soft bright rose-pink flowers for a long period, ht. 5 in....per doz. 12/- 1 3
 - New Double Begonia, "Graf Zeppelin,"** a very decorative bedding variety, producing in abundance small very double flowers of a rich deep scarlet, ht. 10 in., per doz. 8/6 0 9
 - New Mexican Species, "Martiana grandiflora,"** a fine handsome species delighting in sunny situations; it has an erect pyramidal growth, and is covered the whole summer with fiery rose-carmine flowers, ht. 1½ ft.per doz. 5/6 0 6
 - BELLADONNA & GUERNSEY LILIES.** See *Amaryllis*, page 13, *Nerine*, page 63.
 - BELLEVALLIA romana (Roman Squill),** producing in May elegant long spikes of bell-shaped flowers, opening deep azure tipped rose, and passing off bronze with white tip, ht. 10 in.per doz. 3/6 0 4
 - × **BESSERA elegans (Coral Drops),** a beautiful Mexican bulbous plant producing from August to September graceful umbels of drooping bell-shaped bright scarlet flowers; grow in pots for indoors, or plant on rockwork in Spring in a compost of loam, leaf-soil, and sand, 1 ft.per doz. 5/6 0 6
 - BLOOMERIA aurea,** producing in June beautiful umbels of golden-yellow flowers, striped brown, a fine showy flower for beds and borders, ht. 15 inches; it likes a light rich soil
per 100, 15/-; per doz. 2/3 0 3
 - BOBARTIA collina,** a beautiful Summer-flowering bulb. See *Homeria*.
 - BOMAREA salsilla (syn. oculata),** a beautiful climber, for greenhouse or warm positions outdoors, producing clusters of red flowers spotted purple; it likes a compost of rough sand, turfy loam and peat, and while in growth it should occasionally be given manure water
per 100, 10/6; per doz. 1/6 0 2
 - × **BOUSSINGAULTIA baselloides (The Madeira Vine),** an elegant climber, valuable for hanging baskets, window boxes, rustic tubs, etc., leaves pale green and fleshy, flowers white and hawthorn scented; hardy on dry rockwork, or in well-drained sunny situations, otherwise plant in March, lift the roots in autumn and store in sandper 100, 8/6; per doz. 1/3 0 2
 - × **BRAVOA geminiflora (Scarlet Twin-flower),** a handsome hardy plant for light soils and a sunny situation, throwing up in July elegant racemes of orange-red tubular flowers, 1½ ft.; it is best planted in March and lifted in Octoberper 100, 15/-; per doz. 2/3 0 3
 - BRODIAEA (Californian Hyacinth),** a very beautiful family of hardy bulbs, well deserving a place in every choice border, or for select nooks on rockwork. June-July flowering. *When planting surround the bulbs with sharp sand.*
 - Bridgesii,** a fine distinct species, bearing umbels of pretty purplish rose flowers with light centre, 1½ ft.per doz. 3/6 0 4
 - californica (syn. Austinæ),** the largest-flowered of all the Brodiaeas; flowers of a delicate heliotrope shade of colour, borne in graceful umbels, ht. 15 in.per doz. 3/6 0 4

BRODIAEA—*continua*.

each—s. d

- candida**, bearing umbels of large flowers, very pale blue, almost white, a handsome border plant, 1 ft.per doz. 9/6 o 10
- capitata alba**, bearing on tall stems umbels of lovely pure white flowers, 2 ft. ,, 3/6 o 4
- coccinea** (Scarlet Fire-Cracker of California), a remarkably handsome plant bearing graceful umbels of long tubular blood-red flowers, tipped green, 1½ ft. ...*large bulbs*, per doz. 4/6 o 5
- congesta**, lilac flowers in rosettes, valuable as a cut flower, 2 ft., per 100, 5/6; ,, 10d. —
- grandiflora**, a most valuable dwarf early Summer flower for edgings, masses, etc., colour bright blue, ½ ft.per 100, 5/6; per doz. 10d. —
- Hendersoni**, handsome umbels of chrome-yellow flowers, striped violet ,, 5/6 o 6
- Howellii lilacina**, bearing clusters of elegant tubular flowers, pale lavender tipped white, remarkably beautiful. FIRST-CLASS CERTIFICATE R.H.S.per doz 8/6 o 9
- Ixioides splendens**, a very handsome and beautiful variety bearing large umbels of light yellow flowers..... per doz. 3/6 o 4
- laxa** (*syn. Tritelleia laxa*), large rich Tyrian purple flowers, very handsome, 1 ft. per 100, 10/6; per doz. 1/6 o 2
- Murrayana**, large deep violet-blue flowers, very handsome; a free grower and a good bulb to naturalise, ht. 9 in.per 100, 25/-; per doz. 3/6 o 4
- peduncularis**, a fine handsome species, bearing magnificent umbels of large china-white flowers on very long pedicels; it likes a damp sandy loam, and does well on the sandy margins of streams per doz. 2/6 o 3
- Purdyi**, a handsome new species, of pretty dwarf habit, flowers borne in graceful umbels, soft lilac with a handsome violet bar running down centre of each petal..... per doz. 6/6 o 7
- stellaris**, a fine dwarf species for bedding, bearing clumps of deep blue flowers... ,, 3/6 o 4
- volubilis** (The Twining Hyacinth), a lovely twining species, bearing a terminal cluster of pretty delicate rose-coloured flowers; a light covering during Winter is advisable. A pretty plant for hanging baskets*large bulbs*, per doz. 4/6 o 5
- BULBOCODIUM vernum**, producing early in Spring a mass of bright rose-purple flowers, valuable for edgings, rockwork, and naturalising in grass, ½ ft.per doz. 3/- o 4
- × **CALADIUM**, perhaps the most beautiful and picturesque of foliage stove plants.
12 beautiful named varieties, 15/-, 24/-, 30/- & 42/-; 6 ditto, 7/6, 12/-, 15/- & 21/-
- CALLA, or Arum Lily.** See *Richardia*.
- CALOCHORTUS**, or more popularly known as the **Butterfly** or **Mariposa Tulips**, **Globe Tulips** and **Star Tulips**. These lovely Californian bulbs, although belonging to the same Natural Order

GROUP OF MARIPOSA TULIPS.

as the Tulips of our gardens, bear little resemblance to them. They flower through June and July, and for delicacy of texture and brilliancy of colour are unsurpassed; they deserve a place in every hardy flower border and rock garden.

As cut flowers the Calochorti are of great value, the flowers lasting well and the buds opening readily in water; the varieties in the *Mariposa* or *Butterfly* section are especially suitable to cut, having long stems and being profuse continuous bloomers.

They all make charming pot-plants (several bulbs in a pot) for the cool greenhouse or Cape pit.

CULTURE OUTDOORS.—*The Calochorti* are all quite hardy. The "*Mariposa*" and "*Star Tulips*" require a sunny position and light gritty or sandy soil on slightly raised beds to ensure perfect drainage; plant from September to end of November, 2 to 3 inches deep, and 3 inches apart. Cover the beds after planting with straw or cut heather, to keep surface sweet and as a protection in case of early growth; remove the covering in March. A position facing south and sunny spots on the rockery are specially suitable. When in full growth give occasional soakings of water, but not too frequently. After flowering, ripen off by placing glass over them, and take up when foliage dies down.

The "*Globe Tulips*," being woodland plants, like partial shade and a porous soil composed principally of leaf mould.

CALOCHORTUS—continued.

Selections of Calochorti, from Sections I, II, and III:

3 each of 20 beautiful varieties	22/6
3 " " 12 " "	7/6, 12/- & 18/-
1 " " 12 " "	3/-, 4/6 & 6/6

☞ In the following List the numbers after the names indicate their relative order in time of flowering : thus those marked (1) are the earliest to bloom, and those marked (6) the latest. The heights we give are an average ; under exceptionally good or poor conditions the plants may grow taller or dwarfer.

each—s. d

- SECTION I.—Butterfly or Mariposa Tulips**, all of remarkable beauty, with large open flowers.
- Catalinæ** (2), *the earliest of all the Mariposa Tulips*, bearing on tall slender stems very beautiful large flowers ranging from pale to deep lilac, with a dark maroon circle at base, ht. 16 to 24 in.per doz. 7/6 o 8
- Gunnisoni** (4), large pure white expanded flowers, with an inner hairy zone of green and gold, petals shaded outside green and azure, of great beauty, ht. 18 to 24 in., fine for cutting, AWARD OF MERIT R.H.S. per doz. 7/6 o 8
- Kennedyi**, a most lovely species, although a little difficult to grow ; the flowers are of a brilliant brick-scarlet with black central blotches, ht. 6 to 12 in. Plant in a warm sunny situation in a stony or gravelly soilper doz. 15/- I 6
- Leichtlini**, a pretty species from the Sierras, found growing at an elevation of 5,000 to 10,000 ft., flowers yellowish white, with dark basal blotch, ht. 6 to 12 in. per doz. 3/6 o 4
- luteus concolor** (Baker), a grand variety with large open flowers, golden-yellow, centre fringed and prettily marked with brownish red. AWARD OF MERIT R.H.S....per doz. 15/- 1 6
- macrocarpus** (4), a splendid species, bearing very large flowers of a beautiful pale lavender, with dark centre banded green, ht. 12 to 18 in. AWARD OF MERIT R.H.S. per doz. 6/6 o 7
- nitidus** (4), bearing several large flowers, white flushed lilac, each petal covered with long hairs, and having a bold indigo blotch, beautiful, ht. 15 to 18 in., per 100 18/6 ; per doz. 2/8 o 3
- Nuttallii**, a tall species with very large flowers of finest form, pure white, zoned dark brown at base, very handsome.....per doz. 4/6 o 5
- Plummeræ** (4), bearing a branching spike of beautiful large soft lavender flowers, each petal lined with long silky golden hairs, ht. 12 to 18 in. FLORAL CERTIFICATE R.H.S. per doz. 7/6 o 8
- splendens atro-violaceus** (5), having handsome brilliant purple flowers, with deep red blotch on petal, free-flowering, ht. 24 to 30 in.per doz. 4/6 o 5
- ” **ruber** (4), bearing on tall slender stems large showy flowers of an exquisite lilac shade with purplish red centre, and covered with silky hairs, very beautiful. ht. 16 to 30 in.per doz. 6/6 o 7
- Venustus group**, all having flowers of exquisite beauty, large and elegantly formed, valuable for cutting, ht. 2 ft. ; *these are all robust growers.*
- ” **citrinus** (4), large flowers of a beautiful clear bright yellow, with conspicuous dark maroon blotch on middle of each petal, centre finely speckled maroon, and with a cushion of golden hair, *of exquisite beauty* ; a gem for cutting, ht. 16 to 24 in. FIRST-CLASS CERTIFICATE ...per 100, 10/6 ; per doz. 1/6 o 2
- ” **El Dorado** (3), a new race of the lovely *Butterfly Tulips* of tall sturdy growth, from 1½ to 2 ft. in ht., flowers varying greatly in shade—from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon, all having the centre exquisitely blotched and speckled soft brown and golden-yellow, while some have a beautiful golden blotch on each petal. AWARD OF MERIT R.H.S.per 100, 12/6 ; per doz. 1/9 —
- ” **oculatus**, a most beautiful variety, forming very long dark rose-coloured buds opening white with very dark blotch on petal, margined yellow, centre beautifully marked, exterior of flower rosy purple. AWARD OF MERIT R.H.S. per 100, 10/6 ; per doz. 1/6 o 2
- ” **purpurascens** (4), a lovely variety, flowers large, outside purplish, inside creamy white, each petal handsomely blotched, very free-flowering, ht. 12 to 24 in. AWARD OF MERIT R.H.S.per doz. 4/6 o 5
- ” **robustus** (4), a handsome vigorous form, of easy culture, flowers varying from white with dark eye to brilliant purple with dark eye surrounded with yellow, of great size, ht. 12 to 16 in.per doz. 4/6 o 5
- ” **roseus**, flowers white to pale yellow, with a beautifully marked centre and a rose blotch at apex of each petal, ht. 12 to 28 in.....per doz. 4/6 o 5
- ” **Vesta** (4), a lovely variety and one of the freest growers ; flowers large, and borne freely on long stalks, colour outside rose-purple, inside creamy white, with a broad halo of crimson-maroon and below this crimson-brown pencilling on a lemon ground, ht. 20 to 30 in. ... per 100, 18/6 ; per doz. 2/8 o 3
- ” ” *extra large bulbs* ” 5/6 o 6
- Weedii** (4), a showy species, with large clear orange-yellow flowers, thickly lined with silky hairs and dotted brown, ht. 12 to 16 in.....per doz. 7/6 o 8
- mixed Butterfly or Mariposa Tulips** in great variety. Everyone should grow these gems both in the open ground, on rockwork, and in pots ...per 100, 12/6 ; per doz. 1/9 —

CALOCHORTUS—continued.

each—s. d

SECTION II.—Globe Tulips or Fairy Bells.—These are the perfection of grace, with beautiful globular drooping flowers; charming little subjects for half shady nooks on rockwork. They were formerly known as *Cyclobothras*.

- albus (Fairy Lamp)** (3), a species from the Sierras, bearing on branching stems several pearly white hairy flowers, which hang in pendent globes, ht. 12 to 14 in.,
per 100, 12/6; per doz. 1/9 0 2
- „ **The Pearl**, a species from the Coast Range, bearing larger and handsomer flowers of a pearly white tinged pink and brown, very globularper doz. 3/6 0 4
- amabilis** (2), bearing a quantity of golden globe-like pendent flowers, margins fringed with hair, dwarf and beautiful; of easy culture, ht. 8 to 10 in.per 100, 10/6; per doz. 1/6 0 2
- amœnus (Pink Globe Tulip)** (2), a lovely new species, bearing lovely pendent globe-shaped flowers of a beautiful rose colour, ht. 6 to 8 in. FLORAL CERTIFICATE R.H.S.per doz. 4/6 0 5
- pulchellus, true**, a lovely species, with flowers twice the size of *C. amabilis* and of finer form, colour delicate pale lemon *Crop failed* —
- mixed Globe Tulips or Fairy Bells**per 100, 10/6; per doz. 1/6 —

SECTION III.—Star Tulips. These produce dainty open cups on slender dwarf stems, and are of exquisite beauty. On rockwork they are very charming.

- Benthami** (1), bright yellow with dark blotch at base, and covered with yellow hairs, ht. 4 to 6 in.per 100, 15/-; per doz. 2/3 0 3
- Howelli**, a fine *Giant Star Tulip*, with large pale straw-coloured flowers, ht. 12 to 15 in. (*supply uncertain*)per doz. 15/- 1 6
- lilacinus** (1), a beautiful dwarf species bearing numerous large pale lilac flowers, with or without a dark blotch, of easy culture, ht. 6 to 10 in.per 100, 15/-; per doz. 2/3 0 3
- Maweanus, var. roseus**, having large open cup-shaped flowers, white flushed rose, densely covered with silky hairs, ht. 8 to 10 in. (*supply uncertain*)per doz. 5/6 0 6
- Maweanus, var. major** (2), a very lovely species bearing large open cup-shaped white flowers covered with silky blue hairs, ht. 8 to 10 in.per 100, 15/-; per doz. 2/3 0 3
- Purdyi** (3), a very beautiful species of easy culture; it produces stems 10 to 15 inches high, well furnished with very large erect white flowers tinted mauve and green and covered inside with long hairs. FIRST-CLASS CERTIFICATE R.H.S., June 14th, 1898 per doz. 6/6 0 7
- mixed Star Tulips**per 100, 10/6; „ 1/6 —

CAMASSIA (The Quamash), graceful hardy bulbous plants flowering in July, and valuable for flower borders and to naturalise.

- Cusickii**, forming a handsome rosette of broad glaucous foliage, from which rise tall spikes of large pale lavender starry flowers with yellow anthers, ht. 2 to 3 ft., per 100, 15/-; per doz. 2/3 0 3
- esculenta**, producing spikes of pretty star-shaped blue flowers, ht. 1½ ft.; charming when naturalised in grassper 1000, 25/-; per 100, 2/9; per doz. 5d. —
- „ **alba**, having spikes of pretty star-shaped flowers, lavender and white, ht. 1½ ft. ... 1 0
- „ **Royal Purple**, a grand form bearing large handsome spikes of large flowers of a rich dark purple-blue shade, ht. 1½ ft.per doz. 10/6 1 0
- Leichtlini**, bearing elegant spikes of large creamy white starry flowers and handsome dark glaucous foliage, *rare*, ht. 2 ft.per doz. 6/6 0 7
- „ **Purple King**, having handsome rich violet blue flowers, ht. 2 ft. ... „ 5/6 0 6
- „ **new seedling varieties**, containing many beautiful shades of blue, lavender, French white, etc., flowers large and handsome, ht. 2 ft. per doz. 5/6 0 6
- Fraseri**, a distinct species from California, with pretty delicate pale blue flowers, ht. 1 ft.
per 100, 8/6; per doz. 1/3 0 2

CANNAS. See our *Spring Catalogue of Bulbs and Tubers*.

CHINESE SACRED LILY. See *Narcissus Polyanthus*, page 63.

CHIONODOXA (Glory of the Snow). The *Chionodoxa* is one of our earliest as well as loveliest Spring flowers, and in very early Spring its sheets of blue are a great attraction in the garden. It should be largely used in borders and dotted over bulb beds, also massed on rockwork. Once planted it comes up year after year, the flower spikes increasing in size and beauty each season. If grown in pots and jardinetts the *Chionodoxa* may be had in bloom early in January, but should be brought on in a cold frame or cool greenhouse close to the glass. When associated with *Narcissus minimus*, the effect is very charming. *For an effect the first season*, plant the bulbs close together.

- Lucillæ (The Glory of the Snow)**, colour deep Nemophila-blue, with clear snow-white centre
per 1000, 40/-; per 100, 4/6; per doz. 8d.

Ratrayi , a splendid new species from Central Africa, bearing in umbels very large handsome pure white flowers; a noble stove plant, ht. 20 in.	8	6
yemense , bearing very large satiny white fragrant flowers; a very beautiful plant for warm greenhouse or for planting beneath a south wall in warm localities, ht. 2 ft.	2	6
× CROCOSMA aurea , lighting up the garden in September with its graceful racemes of brilliant reddish orange flowers, which are greatly prized for cutting, ht. 3 ft. The best treatment is to start the bulbs in pots in Spring and then plant out in a light rich soil in April or May. Leave them undisturbed, but give a light covering during Winter. For filling beds and massing in borders or as a pot plant (6 bulbs in a pot) it can be strongly recommendedper 100, 7/6; per doz. 1/3	—	3
× imperialis , a grand acquisition, producing in September flowers nearly 4 inches across, and of a fiery orange-red colour; a tall and vigorous grower, and exceedingly showy, ht. 4 ft. FIRST-CLASS CERTIFICATE R.H.S.per doz. 12/6	1	3

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a deservedly prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or pure white Crocuses when they expand their blossoms, in February and March. In lawns and pleasure parks, planted in the grass, Crocuses are extremely effective. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip.

For outdoors plant as shallow as possible, barely covering the bulb; many amateurs plant too deeply, which is often the cause of failure in their blooming. Early plantings give the best results.

BARR'S CHEAP SHOWY CROCUSES for Large Plantings.

For a gorgeous effect in early Spring nothing can equal the Golden-Yellow Crocus, large masses of which attract the eye at a great distance. The value of the larger sized bulbs of Yellow Crocuses is that they produce more flowers to a bulb, and are therefore more decorative.

BARR'S CHOICE NAMED LARGE-FLOWERED CROCUSES.

Large Bulbs for Pot-Culture and Flower Beds, etc.

The following large-flowered named **Crocuses** are the best in cultivation, and we can confidently recommend them for planting in groups, edgings, select beds, and in designs. To obtain the finest effect the bulbs should be planted an inch apart. When grown in pots, plant thickly, and plunge pots in ashes only up to the rims. When removed from under the ashes, place in an airy situation, and give water very freely at the roots. A charming effect is obtained by growing **Crocuses** in shallow saucers, using **Barr's Fertilised Cocoa Fibre Mixture**, or **Pebbles and water** (the bulbs touching one another), and this may be accomplished in an ordinary sitting-room.

CROCUSES.

BARR'S AUTUMN-, WINTER- AND SPRING-FLOWERING SPECIES.

No hardy garden is complete without these floral gems, which carry on a continual display of bloom from August to March, and light up the garden with their bright colours in winter when few other plants are flowering. On rockwork and in grass they form a charming picture, while in pots they make a very pretty effect. In nomenclature we have followed Mr. GEORGE MAW'S MONOGRAPH ON THE CROCUS. The delightful effect produced by masses of **C. speciosus**, **C. longiflorus**, **C. sativus**, **C. Tommasinianus**, etc., when naturalised, can only be realised by those who have witnessed it.

CULTURAL DIRECTIONS.—Any ordinary garden soil suits these Crocuses. Plant the bulbs as early as possible, and very shallow, barely covering them with soil.

Selections of Autumn-, Winter-, and Spring-flowering Species.

A Full Descriptive List of our Crocus Species, with their native habitats given, may be had on application.

CROCUSES—AUTUMN-, WINTER- AND SPRING-FLOWERING SPECIES—continued.

The few species quoted in the following list are mostly those we can offer cheaply in quantity, and we can strongly recommend them for naturalising and massing on rockwork, in grass, etc., where their beauty will delight the eye from Autumn till early Spring.

” **hycmalis.** See Winter Aconite.

EREMURUS, beautiful border plants of noble aspect. They delight in a half-shaded situation protected from the morning sun and sheltered from high winds; a rich deep well-drained loamy soil should be given them.

Bungei, flowers in July, yellow with orange-coloured anthers, covering one-third of the stems, quite hardy; a handsome border plant, ht. 5 to 6 ft. 7 6

himalaicus, a most lovely species from the Himalayas, and one of the hardiest. It attains a height of 5 to 8 ft., bearing dense flower-spikes nearly 2 feet long of large snowy white flowers with golden anthers, from May to June..... 2/6 & 3 6

himrob, a grand hybrid from *himalaicus* × *robustus*, flowering early and producing immense long flower spikes, densely clothed with large flowers of a beautiful blush shade, ht. 8 ft. 5 6

robustus, a lovely species, producing large stately spikes of flesh-coloured flowers in May and June, ht. 6 ft. *Roots according to size, each 5/6, 7/6 &* 10 6

” **Elwesianus**, a grand variety, bearing in Summer noble and stately spikes, crowded with large beautiful flesh-coloured flowers, delicately scented, ht. 6 to 10 ft. AWARDED FIRST-CLASS CERTIFICATE R.H.S. 7/6 & 10 6

ERYTHRONIUM (Dog's-Tooth Violets). In Spring there is no prettier sight than a mass or edging of **Dog's-Tooth Violets**, with their prettily variegated foliage and graceful Cyclamen-like flowers. Naturalised in grass they present a charming picture.

Δ indicates the large handsome American varieties strongly recommended for choice positions in the rock-garden or for pot-culture; they all prefer a partially shaded and moist but well-drained situation. Plant the roots about 3 inches deep and surround with sand.

These American Erythroniums will be sent out early in October, and should be planted at once. The other Erythroniums can be supplied in September.

ERYTHRONIUM—*continued*.

ERYTHRONIUM White Beauty. See Novelty List, page 5.

EUCHARIS amazonica (*The White Amazon Lily*), the snow-white flowers of this handsome stove-plant are deliciously fragrant, and are much used for bouquets and wreaths, ht. 1 $\frac{1}{2}$ ft. We can offer fine well-grown healthy plants free from mite, as follows:—

Strong flowering single bulbs, established in pots, per doz. 21/-; each 2/-
Established pots of several bulbs... per pot, 7/6. Fine specimen plants... each 10/6, 15/- & 42/-

\times **EUCOMIS punctata,** a handsome Autumn-flowering plant, with spotted foliage and long spikes of wax-like white stary flowers spotted rose, very fragrant, ht. 2 ft. Plant out of doors in March or April in a rich light soil and sunny situation, or pot up earlier for indoor decoration; in Autumn lift the tubers and store in dry soil during winterper doz. 7/6 o 8

FREESIA. Freesias are prized for their delightfully fragrant graceful flowers, which last longer in water than almost any other flower. They are easily grown, and may be forced into bloom by Christmas if required. Plant the bulbs in September and October, 6 in a 5-inch pot, or 12 in a 7-inch pot makes a better display. The tops of the bulbs should be buried 2 inches below the surface of the soil, which should be a compost of good mellow loam, well-decayed farmyard manure and a little bonemeal. Care must be taken that there is good drainage. Stand the pots outside on a sunny border and keep them slightly shaded until growth is showing, when expose them to full sun. About the end of October, or before severe frost comes on, remove the pots to the sunny part of a greenhouse and give plenty of air (not draught). Or they may be placed in an airy, sunny window, care being taken not to expose them to draught or the drying heat arising from gas. When the flower buds are opening, a little weak liquid manure water will be found beneficial.

Leichtlini major (<i>true</i>), primrose, with orange blotch, 1 $\frac{1}{2}$ ft., per 100, 6/6; per doz. 1/-	—

FRITILLARIA imperialis—the Crown Imperial.

FRITILLARIA IMPERIALIS (CROWN IMPERIAL).

The Crown Imperial (Fritillaria imperialis) is a stately hardy border-plant, very effective in Spring. Its tall, stout, leafy stem terminates in a cluster of large drooping bell-shaped flowers, surmounted by a whorl of fresh green leaves. For forming bold groups in the permanent border or on lawns it is of great value, and should be allowed to remain undisturbed. To obtain the best success, plant the bulbs in September and by preference on their sides, to prevent moisture accumulating in the centre. We offer specially strong selected bulbs, superior to what are usually sold, and which we hope will all bloom the first season. The Crown Imperial, however, is a plant which is always better the second year of planting.

- Deep Orange-red**, very showy, ht. 3 ft.per. doz. 4/6 0 5
- Fol-variegatis**, orange-red flowers, graceful variegated foliage, ht. 3 ft. per doz. 8/6 0 9
- Giant Red**, handsome orange-red flowers of immense size, ht. $3\frac{1}{2}$ ft. per doz. 18/6 1 9
- Large Yellow**, bearing large handsome yellow flowers, ht. $3\frac{1}{2}$ ft. per doz. 8/6 0 9
- Mixed**, various shades, suitable for naturalising *strong selected bulbs*, per doz. 6/6 —

GALANTHUS (Snowdrop).

In the early Spring months there is nothing more beautiful than a sheet of the snowy graceful blossoms of the SNOWDROP. In planting, the bulbs should almost touch each other. An effect of surpassing beauty may be obtained by associating SNOWDROPS with SCILLAS SIBIRICA and BIFOLIA, CHIONODOXAS, WINTER ACONITES, etc. Where possible such plantings should be permanent, and the surface of the soil top-dressed in Summer and sown with annuals, such as Nemophila, Leptosiphon, etc., or planted with surface-rooting bedding plants. The SNOWDROP and CROCUS when planted in alternate circles are very effective, and follow each other so closely that no gap is left in the succession.

GALANTHUS—continued.

The SNOWDROP looks charming when nestling in grass, on hedge banks, etc. The turf need not be disturbed if *Barr's Bulb Planter* be used (see page 91); this cuts out clean holes large enough to take two or three bulbs. The Giant Single Snowdrop, GALANTHUS ELWESII, should be extensively used; its flowers are large and valuable for cutting. In its wild state it is found growing with the CHIONODOXA, and the two associated together present a lovely picture.

Permanent plantings of Snowdrops should be made as far as possible in shady situations.

GALANTHUS WHITTALLI
(Much reduced).

- × **GALTONIA candicans** (*Hyacinthus candicans*), the Great Snow-White Summer-flowering Hyacinth, growing 3 to 6 ft. high, according to soil and situation, and bearing a spike of 20 to 50 pure white bell-shaped flowers; a handsome decorative plant for grouping in the flower border or on lawns, also a fine pot-plant for the conservatory. Very effective when grouped with the scarlet *Gladiolus Brechtleyensis*. Plant from October to March, covering the Autumn plantings with a little litter for the first winter. *Strong bulbs*, per 100, 5/6; per doz. -/10. *Extra large bulbs*, per 100, 7/6; per doz. 1 3
- GASTRONEMA.** See *Cyrtanthus*.
- GEISSORHIZA Rochensis**, a Cape bulb of exquisite beauty, bearing in June intense Tyrian blue flowers with rich crimson blotches in centre; a little gem for pot-culture and sunny nooks on rockwork, ht. $\frac{3}{4}$ ft.per doz. 7/6; each o 8
- GELASINE azurea**, a beautiful South American bulbous plant, producing in early summer umbels of lovely deep blue flowers, ht. 1 ft.; *keep the bulbs dry during winter*, per doz. 8/6; each o 9
- GERANIUM tuberosum** (*Tuberous-rooted Crane's-bill*), an elegant creeping plant bearing several violet-rose flowers in Summer; hardy in sunny spots on rockwork per 100, 5/6; per doz. o 10
- GERBERA Jamesoni.** See *Novelty List*, page 6.
- × **GESNERAS**, a very beautiful family of greenhouse plants requiring similar treatment to the Achimenes; their handsome velvety foliage and elegant spikes of brilliantly coloured flowers render them objects of great beauty. 12 beautiful kinds, 10/6; 6 ditto, 5/6

× **GLADIOLUS.**

BARR'S EARLY-FLOWERING VARIETIES.

For Autumn and Winter Planting.

EARLY-FLOWERING GLADIOLUS "BLUSHING BRIDE"
(Much reduced).

These beautiful Early-flowering Gladioli should be largely planted for supplying cut bloom from May to July; and for the fine effect they produce in the flower garden. **G. Colvillei** The Bride is extensively grown in pots and boxes for cutting during April, May, and June. All may be grown in pots for indoor decoration.

CULTURE OUTDOORS.—Select a situation protected from cutting winds and shaded from the midday sun. Deeply dig the ground, working in plenty of rotten manure in the underspit, and see that the soil is made light and friable; plant the bulbs from October to January, at a depth of four to five inches, and in the case of the later plantings soak the bulbs in water a few hours before putting them in the ground. Before severe frost comes on cover with a little long straw litter or other light material, which remove in March. *Gladiolus byzantinus* and the *Colvillei* varieties are best planted in October or early in November. If the Summer is dry and the weather hot, give an occasional good soaking of water or weak liquid manure. A mulching of well-decayed manure in early summer will considerably benefit the plants.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a 5-or 6-inch pot, and plunge in ashes up to the rim of the pot in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried up to the rim in ashes out of doors under a south wall, a light covering being given during severe frost. When the plants are in bud they may be removed to the conservatory or greenhouse.

BARR'S CHOICE NAMED HYACINTHS.

For Glasses, Jardinets, Bowls, Pots, and for Exhibition.

Culture in Pots.—The soil should be a compost of good fibrous loam with a liberal addition of leaf-soil, sharp sand, and thoroughly well-decayed cow manure. PHYTOBROMA (*see page 92*) may also be added at the rate of 1 lb. per bushel. The compost should be well mixed and left to stand some time before being used. New pots should be well soaked in water before use.

In potting, barely cover the bulb, and let the soil be ¾ in. below the rim of the pot, to allow for watering. After potting give one good watering and then place the pots outdoors on a bed of ashes, cover with six inches of cocoa fibre, and leave them exposed to all weathers. *When the bulbs have well rooted*, and made about an inch of top growth, they may be removed indoors, first into a subdued light, until the blanched foliage has attained its full green colour, and then into the sunniest situation at command in the greenhouse or conservatory. It is a good plan to place an inverted flower pot over the young growths for a few days after being removed from the plunging bed, as by so doing they are protected from possible draught. Abundance of air, a moderately moist atmosphere, and plenty of water at the roots are then necessary for early well-developed flower-spikes. *A dry or frosty atmosphere or a draughty situation* will cause the flower-buds to shrivel. *Forcing should only be done gently*, the temperature not exceeding 60 degrees. A too frequent fault made in forcing Hyacinths is that they are subjected to heat before the bulbs are fully rooted.

For earliest flowers—namely, for January and February—pot middle of September and leave in the plunging bed 10 to 12 weeks.

✦ If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should not be forced; pot up the bulbs middle of October and leave them plunged out of doors three months or more, according to season, then remove them to a mild temperature like that of a cool greenhouse, a sitting-room window, or frame, always selecting the sunniest and most genial situation.

Culture in Glasses.—*We recommend only Single Hyacinths for glasses.* The most reliable sorts for growing in glasses we have indicated by Ψ. Pure clean water (rain-water by preference) the same temperature as the room should be used, with a piece or two of pure wood charcoal in it. The bulb can be made secure in the glass by a piece of fish netting, and its base should at all times just touch the water. Place the glasses in a *cool dark place* to encourage root growth, and keep supplied with water as required. When nearly full of roots (not before), and an inch or two of top growth has been made, admit them to the light gradually, and then to the sunniest place at command where there is full light and an even airy temperature. *Avoid a too dry or frosty atmosphere or a draughty situation*, as such conditions will often cause the flower-buds to shrivel up. A little rain-water gently sprinkled daily on the green flower-spikes will assist in their development. *Barr's Fertilised Fibre and Charcoal Mixture* is an excellent material for growing Hyacinths in, and is clean and inoffensive to handle (*see page 2 for directions*).

Culture in Jardinets.—For this purpose *Barr's Fertilised Fibre and Charcoal Mixture* is undoubtedly the best material to use. It should be always kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss or mossy Saxifrage. Grown in jardinets, Hyacinths are charming when associated with early Spring-flowering bulbs like *Chionodoxas*, *Scilla sibirica*, *Snowdrops*, *Tulips*, *Crocuses*, *Narcissi*, *Iris reticulata*, etc.

Hanging Moss Balls of Hyacinths.—Very charming hanging baskets of Hyacinths can be made with balls of fresh Sphagnum moss, 9 inches in diameter. First make up a ball of moss about 8 inches in diameter, into which insert the Hyacinth bulbs all round, binding them in with string and more moss so that only their points are visible. Then run a wire through by which the ball can be suspended in greenhouse or sitting-room window. No more attention will be required except to dip the ball in water about once a fortnight. Such hanging baskets can be effectively made with *Named or Bedding Hyacinths*, and also with *Roman Hyacinths*. The open wirework baskets which are sold can be filled in the same way.

BARR'S NEW "PRIZE-WINNING" EXHIBITION HYACINTHS.

A very careful selection of a few of the finest Hyacinths for Exhibitors.

We have selected these varieties out of many hundreds, as being specially suitable for exhibition on account of their grand spikes of fine form, their large bells and beautiful colours. Several of them are new varieties, and a great advancement on existing kinds. Most of them have been awarded prizes and certificates of merit.

Ψ indicates those sorts which should be selected where the bulbs are required for growing in glasses.

BARR'S FIRST-SIZE NAMED HYACINTHS.

Bulbs the Finest of the Season's Crop.

The varieties of Hyacinths described below, and included in the following selections, we have personally selected during our many visits of inspection to the Finest Hyacinth Farms in Holland, and experience has proved them the most worthy of cultivation.

For the convenience of buyers we have indicated the relative earliness or lateness of the various kinds by (1), (2), (3), (4): thus those marked (1) are the first to bloom, those marked (4) are the latest.

BARR'S "Extra Selected" BEDDING HYACINTHS.
For Bedding, Boxes, Bowls, or Pot-Culture.

The following Hyacinths are of an extra selected quality, and far superior to what are commonly sold as "Bedding Hyacinths" at lower prices. The varieties selected are those having large erect well-formed spikes of uniform height and rich brilliant colours, and only differ from the named Exhibition Hyacinths in the bulbs being a shade smaller in size. They may also be used with advantage for filling flower boxes, rustic baskets and vases, etc., and for making into hanging baskets (see page 35). As some varieties open a little earlier than others, we have classified them into two sections—(1) Those which commence to flower first and about the same time, and (2) those which come to perfection a little later, and bloom about the same time. We trust this arrangement will be of assistance to purchasers in making their selection. *Orders should be sent in early to secure finest bulbs.*

SECTION 1.—Varieties coming first to perfection, and which may be bedded together.

BARR'S "RAINBOW" MIXTURES OF HYACINTHS.
For Filling Beds and Planting in Borders, etc.

Barr's Beautiful "Rainbow" Mixture of Hyacinths. These are grown specially for us on one of the large Hyacinth Farms in Holland, and are unsurpassed for quality. The colours are judiciously blended, including *red, scarlet, purple, lavender, porcelain, azure-blue, white, rose, bluish, etc.*, producing a magnificent effect in flower beds and borders. Purchasers cannot fail to be pleased with them.

Extra strong flowering bulbs, per 100, 17/6; per doz. 2/6

BARR'S MINIATURE HYACINTHS for Children's Gardens, etc.

In *children's gardens* and small flower-beds, or as front edgings and ribbons, these **Miniature Hyacinths**, alone or intermingled with other dwarf Spring-flowering bulbs, make a fine display throughout the Spring months. They are also valuable for growing in small glasses, fancy pots, china bowls, crystal dishes, jardinetts, etc., alone or associated with *Scilla sibirica*, *Chionodoxas*, *Crocuses*, *Snowdrops*, *Dwarf Tulips* and *Daffodils*, *Iris reticulata*, etc. *For cultural directions, see page 35.*

Collection of 3 Bulbs each of 9 distinct colours, 5/-

EARLY WHITE ROMAN HYACINTH.
Extra Selected French-grown Bulbs.

This charming little Hyacinth is of great value for early forcing, and may be had in bloom during November, December, and January by successional plantings. Several bulbs in a pot make a charming Winter decoration for the greenhouse or sitting-room, while to cut for bouquets and vases the graceful spikes of sweet-scented blooms are highly prized. The Roman and Italian Hyacinths lend themselves readily to culture in bowls of pebbles and water or our fertilised cocoa-fibre and charcoal mixture. (*For Cultural Directions, see page 1.*)

Second-size bulbs we do not stock, as they produce so few flowers, but we can procure them for customers if required.

**Barr's "Extra Early"
WHITE ROMAN HYACINTH.**

BARR'S EXTRA EARLY ROMAN HYACINTHS
GROWN IN BOWL OF PEBBLES AND WATER.

These **Extra Early White Roman Hyacinths** have been grown *especially* for us in a warm climate, and have thereby gained a superiority over the *French-grown Roman Hyacinths* in flowering three weeks or more earlier, and generally more freely. The elegant little sweet-scented flower-spikes may be had in bloom during October, November, and December, if the bulbs are potted up early and forced in succession. They are greatly prized for bouquets, while the individual flowers are of great value for buttonholes. Grown in bowls of pebbles and water or our prepared cocoa-fibre and charcoal mixture, they afford a charming decoration for the greenhouse or sitting-room. (*For Cultural Directions, see page 2.*) The supply of these **Extra Early White Roman Hyacinths** is limited. s. d

Strong Selected Bulbs..... „ 21/-; „ 3 0

ITALIAN EARLY HYACINTHS.

These bloom just after the White Roman Hyacinth, and are therefore valuable for succession. They are all of graceful beauty, and may be had in bloom in December and January. These **Italian Hyacinths** can easily be grown in bowls of pebbles and water or our prepared cocoa-fibre and charcoal mixture, and make a very pretty decoration for the greenhouse and sitting-room. per doz.

- Blush**, delicate blush-white flowersper 100, 21/- s. d
3 0
- Ivory White**, producing elegant spikes of white bells with tube delicately tinged creamy
blush, valuable for cutting and succeeding the *White Roman Hyacinth*per 100, 14/6 2 0
- Shell-Pink**, bearing double bells of elegant form, colour a charming shell-pink shaded
blush-white. very beautiful. This variety will only bear very gentle forcing.....per 100, 17/6 2 6
- Straw-coloured**, a lovely hyacinth producing freely graceful spikes of pale chrome-
yellow single flowers; very beautiful when grown in bowls and vases per 100, 17/6 2 6
Extra Strong Bulbs „ 25/- 3 6

N.B.—The above are the best of the **Italian Early Hyacinths**; the **Blue Roman Hyacinth** is now no longer cultivated, and the **Blue Italian Hyacinth** is a coarse flower of little beauty which we cannot recommend to our customers, and we therefore do not offer it.

IRISES.

These may be called the "**Orchids**" of the flower garden, their blossoms competing in richness and variety of colour with the choicest and the most beautiful Orchids. They should be extensively planted in flower and shrubbery borders, and naturalised; a judicious selection will give a display of bloom from Christmas to August. See our *Hardy Plant Catalogue* for all kinds of Flag Irises.

BARR'S ENGLISH IRIS (I. xiphioides).

The Large June-flowering Bulbous Iris of the Pyrenees.

GROUP OF ENGLISH IRISES (*Very much reduced*).

These magnificent Irises thrive in any ordinary garden soil. *The earlier the planting, after beginning of September, the greater the success*, although the bulbs may be put in as late as December. The varieties contained in our collection we have specially selected as being the finest and most distinct, and they will be found as *strikingly beautiful in colour as the most sumptuous Orchids of the hothouse*. They flower from end of June to beginning of July, thus succeeding the **Bearded Flag Irises** and **Spanish Irises**. As cut flowers they take a first place.

Our collection of English Irises is the finest one existing.

In the following descriptions *S.* is used to signify *Standards* or the erect petals; *F.* *Falls*, or the drooping petals. The heights given are those recorded at our Nurseries, but they may differ a little according to soil, season, and climate.

The numbers following the name indicate the relative time of flowering; thus those marked (1) open first, while those marked (4) are the latest to bloom; the difference, however, is only one of days.

BARR'S SPANISH IRIS (Iris Xiphion).

The Orchid-like June-flowering Bulbous Iris of Spain.

GROUP OF SPANISH IRISES (Very much reduced).

The Spanish Irises flower a fortnight before the English, and differ from them considerably, the colours of the flowers being showier and more varied. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare orchids, with which they can well compete in grace and beauty. For vases and bouquets the cut flowers are greatly prized, as they last long when cut, and the buds open well in water. For filling flower-beds and massing in borders these elegant Irises are of the greatest value. The varieties contained in our collection are the *finest* and *most distinct in cultivation*. The cultural treatment is the same as for the English Iris, while they will thrive either in an open or partially shaded situation. This Iris will also bear very gentle forcing in pots, but this should not be attempted until the flower buds are developing.

Wouverman , S. canary-yellow, F. full rich yellow, with golden blotch, large handsome flower, ht. 27 in.		10	6...1 6

VARIOUS BEAUTIFUL IRISES.

Bulbous, Tuberous, and Rhizomatous.

THESE IRIS SPECIES are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species will be more enjoyed if planted on rockwork, where the flowers have a little protection from heavy rains. *Alata*, *Reticulata* var. *Histrio* and *Histrioides*, *Vartani*, and *Unguicularis* (*Stylasa*) vars., are charming Winter-flowering species, followed in February by *I. reticulata*, with its lovely violet-scented blossoms, the sweet-scented *I. persica*, and the beautiful species *I. Rosenbachiana*. Next in succession come the interesting *Caucasica*, *Orchioides*, the curious Snakeshead *Iris tuberosa*, and the new species *I. Sindjarensis* and *assyriaca*. These are followed closely by the *Cushion Irises*, with their large handsome flowers; surpassing in beauty and interest any written description that can be given of them. The pretty Peacock Iris (*I. pavonia*) and the beautiful *Iris cristata* flower in May, and are followed in June by *juncea*, *Boissieri*, *lusitanica*, and *tingitana*.

CULTURE.—The Irises marked Ø in the following list belong to the *Oncocyclus* and *Regelia* sections (*Cushion Irises*), and are remarkable for their great beauty. These are best planted in December, if the roots can be kept in good condition and from growing until that time (they should be stored in a cool and dry place). Plant so that the tops are not more than 1½ inches below the surface, in a light loamy but thoroughly well-drained soil into which plenty of bonemeal has been worked (5 lb. to the square yard); cover with three or four inches of wheat straw or, better still, marsh reeds, or cut heather, which remove in March. Immediately the plants have done flowering place over them a hand light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain till October. The object desired is to thoroughly ripen the roots, and prevent their starting into growth too early. The covering in Winter is to keep off heavy rains, and discourage a premature growth. The *Oncocyclus Irises* like to remain undisturbed for years; they may however be lifted four or five weeks after flowering, and stored on a dry sunny shelf in perfectly dry sand till December. *The great beauty of these Irises, especially when seen in established masses, will fully repay the little extra trouble in growing them.*

The Irises marked † belong to the *Junö* section, and thrive best planted in rich light or sandy soil with a light dressing of old manure. As they are mostly winter and early spring-flowering species give them a position protected from the early morning sun.

(Coloured Plate of the *Oncocyclus Irises, Gatesii, Lorteti, and Lupina*, price 6d. Coloured Plate of *Irises, Atrofusca, Bismarckiana, Atropurpurea, and Helene*, price 6d.)

☞ S. is used to signify **Standards**, or the erect petals; F. **Falls**, or the drooping petals.

	each—s.	d
† Alata (Scorpion Iris), a pretty winter-flowering Iris with pale blue flowers; suitable for sunny sheltered positions, ht. ½ ft. <i>Strong selected bulbs</i> , per 100, 15/-; per doz. 2/3	0	3
† „ alba , a lovely variety of the above with flowers shading from the palest pearly blue to white, ht. ½ ft. <i>Very scarce</i>	3	6
Arenaria , forming little masses only 2 inches high, flowers pretty bright canary-yellow; a gem for dry sunny spots on rockwork in light soil	per doz.	7/6 0 8
Aschersoni , an interesting species from Cilicia, allied to <i>Iris Grant Duffi</i> ; flowers yellow with green tinge, veined and blotched purple, very free-flowering, ht. 1½ ft.	2	6
† Assyriaca , a beautiful species, with large white flowers, resembling in form <i>I. Sindjarensis</i>	3	6
Ø Atrofusca , a handsome Iris, S. claret-brown, veined black, F. brown-black, ht. 3 ft.....	0	9
Ø Atropurpurea , beautiful velvety coppery maroon, with black sheen, 1 ft.per doz.	3/6	0 4
Bakeriana , a very lovely rare species, producing in February flowers of <i>I. reticulata</i> form, S. sky-blue, F. white, blotched and spotted dark violet, sweet-scented. FIRST-CLASS CERTIFICATE R.H.S.	3	6
Ø Barnumæ , a lovely Cushion Iris, standards broad and brilliant violet, falls small and dark ruby-crimson, very distinct, ht. 8 inches	per doz.	9/- 0 10
Ø Bismarckiana (<i>syn. Sari nazarena</i>), flowers large and beautiful, S. sky-blue, veined purple, F. veined reddish brown-purple on a straw-coloured ground, of easy culture, ht. ¾ ft.	per doz.	5/6 0 6
Boissieri , S. and F. rich purple, with golden-yellow blotch, June-flowering, ht. 9 in. „, 9/-	0	10
† Bucharica , a beautiful new bulbous Iris with large satiny white flowers, the falls having a delicate canary-yellow lip, ht. 1 ft. FIRST-CLASS CERTIFICATE R.H.S.	per doz.	18/6 1 9
† Caucasica , primrose-coloured flowers, with silver-margined foliage, ht. ¾ ft. „, 5/6	0	6
Cristata , a real gem, flowers amethyst-blue, striped orange and gracefully fringed, in May; charming for sunny sheltered banks, rockwork, etc., where it can be moderately dry in winter, ht. 3 in.	per doz.	5/6 0 6
Danfordiæ (<i>syn. Bornmulleri</i>), a lovely flower resembling <i>I. reticulata</i> , but flowers bright golden, produced in February, ht. 3 in; it delights in dry nooks on rockwork	per doz.	6/6 0 7
Ø Demawendica , a grand species from Mount Demawend, bearing about the end of May flowers much larger than <i>I. iberica</i> and of a handsome claret colour	5	6
Eggeri , a handsome Cushion Iris, standards vinous purple, reticulated and shaded black, falls purplish black with large yellow beard, very handsome	per doz.	8/6 0 9

BARR'S FLAG IRISES.

Tall Bearded, Dwarf Bearded, and Japanese, etc.

These beautiful Irises form a great feature in our cultures. They supply a floral decoration from March to July. Plant in Autumn—for full descriptive list, see our HARDY PLANT CATALOGUE.

IXIA.—The African Corn Lily.

A most graceful plant, bearing on wiry stems 15 to 21 inches high long loose racemes of bloom of remarkably rich and varied colours. All have a brilliant dark centre, and in the sun's rays present a picture of gorgeous beauty.

CULTURE IN POTS.—From October to January plant five or six bulbs in a four- or five-inch pot, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, and plunge the pots, up to the rim only, in ashes in a cold pit or frame, or under a south wall. Until a little top growth has been made no water should be given, and then only sparingly at first. When the plants are in growth, the lights should be left off except during wet or frosty weather. Early in February, or when sufficient growth has been made, remove the plants to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUTDOORS.—Plant from November to January, at a depth of three inches, and the bulbs two inches apart, on raised beds, in a prepared light loamy soil, in a sunny situation, protected if possible from cold east and northerly winds. When planting cover the bulbs with coarse sand. A covering of straw, litter, heather, or other light material, will protect the early top growth from frosty winds, but it should be removed in March.

LEUCOJUM (Snowflake).

(Spring-, Summer-, and Autumn-Flowering.)

Leucojum vernum, the **Spring Snowflake**, is one of the earliest and most beautiful Spring flowers, handsome in outline and of elegant drooping habit. *L. aestivum* and *Hernandezii*, the **Summer Snowflakes**, flower in April and May, and their elegant blossoms are prized for bouquets. *L. autumnale* and *roseum* are charming little graceful Snowflakes, blooming in August and September; they are best planted in pure sand. *L. trichophyllum* resembles *Autumnale* in its graceful flowers, but blooms in Spring; plant in pure sand, and give cold frame treatment, keeping it well moist while in growth. All the Snowflakes delight in shady situations.

LEUCOJUM—continued.

LEUCOJUM VERNUM CARPATHIC

- each—s. d
- autumnale** (Acis), white and pink flowers in Autumn, graceful in pots and on rockwork, etc., ht. 4 in.; grow in pure sand in shade; quite hardy per 100, 5/6; per doz. 10d.
- trichophyllum** (Acis), pure white, a rare and very beautiful Spring-flowering species; grow in moist sand, give cold frame or cool greenhouse treatment per doz. 3/6 o 4
- æstivum** (Summer Snow-flake), a handsome plant, bearing spikes of elegant drooping white flowers in May, which are greatly prized for cutting, ht. 1½ ft. p. 1000, 45/-; p. 100, 5/-; per doz. 9d. —
- ” ” Smaller bulbs, for naturalisation per 1000, 30/-; per 100, 3/6 —
- Hernandezii** (*syn. pulchellum*), elegant drooping white flowers in May, ht. 1½ ft. per 100, 8/6; per doz. 1/3 o 2
- roseum** (Acis), a pretty little autumn-blooming species from Corsica, bearing elegant little rose-coloured flowers, ht. 4 in. per doz. 7/6 o 8
- vernum carpathicum**, the Spring Snowflake, a robust-growing variety of this favourite little flower; prized for its pretty white bell-shaped flowers in early Spring; valuable for edgings, masses at foot of rockwork, and for naturalising in grass, etc. (*See illustration*) per 1000, 60/-; per 100, 6/6; per doz. 1/- —

BARR'S BEAUTIFUL LILIES,

For Naturalising in Flower and Shrubbery Borders, and for Greenhouse Decoration.

It may be truly said that for chasteness and beauty of colour and form, the Lily stands pre-eminent amongst hardy plants. By a judicious selection of species from different countries a continuous succession of bloom can be maintained from May to October.

Many amateurs have feared to introduce into their gardens these beautiful flowers, imagining that their culture was too difficult, and beyond them. This, however, is not so. There are varieties which are of the simplest culture, such as *Speciosum*, *Tigrinum*, *Elegans*, *Umbellatum*, and the old Cottage Garden Lilies—*Candidum* and *Crocium*. Others require only a little attention as to soil and position, which can be arranged for in most gardens.

In the following list we have indicated in a general way the conditions most suitable for growing the different species to ensure success, and we strongly recommend all who have a love for their gardens to have this beautiful family of plants well represented in their borders.

General Hints on Culture.

Lilies planted out.—The conditions essential to success in growing Lilies may be generally summarised thus:—

A cool rooting medium; Perfect drainage; and Shade from hot sun.

These conditions can be readily fulfilled in the borders of Rhododendron and Azalea beds, or amongst the various subjects grown in the herbaceous and shrubbery border. In such positions the young Spring growths are protected from cold winds, and the ground is kept shaded and cool by the shade of the surrounding plants. This is especially needful in the case of those Lilies which make *stem roots*, as these are only developed freely in shade. On these roots, which are produced at the base of the stem, the flower-head largely depends for its successful development, and the bulb for its preservation. As soon as they appear a light covering of good rich soil should be given, into which they can root freely. **The chief stem-rooting Lilies are indicated in the following list by δ.** There are others which are less dependent on these stem roots, which they only produce when the bulbs are planted on rich soil and in shade.

In preparing the ground for Lilies loosen the soil to a depth of 2 feet or more, and add or fill in the necessary compost (*see notes below*). Plant the bulbs 2 to 3 inches deep, surrounding and covering them with sand, and then top-dress with a compost of light soil and well-decayed manure. As growth advances a mulching of light rich soil should be occasionally given.

During the growing period Lilies should be freely watered.

In late autumn cut down the old flower-stems and give a light covering of leaves or cocoa fibre.

LILIES—continued.

The *Bay* or *Swamp Lilies*—like *Superbum*, *Canadense*, and *Pardalinum*—revel in plenty of moisture and are admirable subjects for the sides of brooks, rivulets, ponds, etc.

Lilies in Pots.—Any one with an unheated greenhouse can easily have a very beautiful show of Lilies in pots during the summer months. The varieties specially recommended for this culture are *Auratum*, *Speciosum*, *Tigrinum*, *Chalcedonicum*, *Umbellatum*, *Elegans*, *Testaceum*, *Hansonii*, *Henryi*, *Giganteum*, *Brownii*, *Longiflorum*, *Kramerii*, *Rubellum*, etc.

In potting use a compost of fibrous loam and sweet decomposed leaf soil, with plenty of coarse sand or a mixture of good peat, loam, and sand. See that the drainage is perfect and the inside of the pot clean to start with. Pot firmly, barely covering the top of the bulb, and leaving room to add more soil when the surface roots appear. Select a situation out of doors, protected from the afternoon sun, and stand the pots on a bed of ashes raised above the general level to avoid stagnant moisture, and make firm to prevent the entrance of worms; then cover with 6 inches of cocoa-fibre or old leaf soil to keep off excessive rains. When top growth begins to show above the covering, remove the pots to a cold frame, pit, or greenhouse, and start giving water sparingly; a little clear weak liquid manure given twice a week when the flower-buds are well advanced will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the plants may be transferred from the cold frame into a gentle heat, but must be kept as near the glass as possible to prevent them from being drawn. Shade should be given to the lower portion of the stems to induce free stem-roots, and these should be top dressed as they appear. Give air freely, and fumigate if required. When coming into bloom a little weak manure-water will be of great assistance to the plants.

To those desiring further information regarding Lilies, we commend Dr. Wallace's "Notes on Lilies" (price 2/6 by post); also Vol. XXVI. of the Royal Horticultural Society's Journal containing a report of the Great Lily Conference at Chiswick, July 16, 1901.

The majority of Lilies are not ready for dispatch before the beginning of November; a few sorts, however, are ready earlier, such as *Candidum*, *Crocium*, *longiflorum*, etc., while some of the Japanese imported varieties do not arrive until December. Orders for Lilies will therefore be executed, if necessary, in two or more parts.

LILIA AURATUMS BEING PREPARED FOR EXPORT FROM JAPAN.

Soils and Situations Recommended for Different Lilies.

|| Indicates those Lilies of easiest culture, being strong free growers thriving in most soils. Where soil is very dry and poor, add loam and peat, or leaf soil; where heavy and damp, add sand and leaf soil. All require good drainage and plenty of moisture while in growth.

Ω Indicates those Lilies requiring a good friable soil, not too dry, and the addition of a little peat is advisable. The lower part of the stems should be kept in shade.

¶ Indicates those Lilies delighting in shady and moist situations, sheltered from strong winds. A well-drained peat soil, where there is bottom moisture for the bulbs to root into, is recommended. Where a brook, stream, or pond is available, they may be planted at the margins, where the bulbs can remain moderately damp, and the roots find all the moisture they require below. In planting cover and surround bulbs with sand.

δ Indicates the chief *stem-rooting* Lilies.

 For several beautiful New Lilies, see Novelty List, page 7.

N.B.—For the Interest of buyers we have added, after the name, the plant's native country.

LILIAM AURATUM, 3 YEARS ESTABLISHED IN POT.

80 Auratum (The White Golden-rayed Crimson-spotted Hill Lily of Japan), ht. 4 to 6 ft. This is indeed the **Queen of Lilies**, and should have a place in every garden and greenhouse. It commences to bloom in August and continues on into September. It is of simplest culture and perfectly hardy. Growing amongst Peonies, and along the margins of evergreens, groups of **L. auratum** (6 to 12 bulbs in a clump, planted 9 inches apart), produce a grand effect. As isolated subjects on large lawns, groups of **Lilium auratum** look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the midday sun. On slopes, in a free soil, rather moist but not wet, this Lily does well, and makes a fine effect.

We are expecting our first consignment of this beautiful Lily to arrive early in December from Japan, and we are booking orders for delivery immediately on arrival, at the following prices. The larger-sized bulbs produce the most flowers.

Auratum , Extra Large Bulbs,	12 for 15/-; 25 for 28/-; 50 for 54/-; 100 for 105/-	
" Splendid Large Bulbs,	12 for 10/6; 25 for 20/-; 50 for 38/-; 100 for 70/-	
" Good-sized Bulbs,	12 for 7/6; 25 for 14/-; 50 for 26/-; 100 for 50/-	
" Smaller Bulbs,	12 for 5/6; 25 for 10/-; 50 for 19/-; 100 for 36/-	
" A few Special Monster Bulbs,	2/- & 3/- each.	
" giganteum .	See Novelty List, page 7.	each—s. d
" pictum , large white flowers, beautifully spotted crimson, and petals tipped red, very showy, ht. 4 ft.	per doz. 21/- 2 0
" platyphyllum , handsome flowers of enormous size, great substance, with broad white petals, spotted crimson, bold handsome foliage, and sturdy habit, ht. 5 to 10 ft.	Strong bulbs, per doz. 21/- 2 0
" " " "	Extra strong bulbs " 27/6 2 6
" rubro-vittatum , large pure white flowers, with a broad deep crimson band down the centre of each petal; a Lily of great beauty and the admiration of all who see it, ht. 3 to 4 ft.	Strong bulbs, per doz. 27/6 2 6
" " " "	Extra strong bulbs " 36/- 3 6
" Wittei , large pure white unspotted flowers, with golden band down each petal, chaste and beautiful, ht. 3 to 4 ft.	Extra strong bulbs, per doz. 36/- 3 6
Alexandræ .	See Japonicum.	
81 Bakerianum (<i>syn. Lowi</i>), a very charming rare lily from <i>Burmah</i> , bearing in July one to five bell-shaped pendent flowers, rosy white, minutely spotted carmine inside, anthers lavender and orange, ht. 3 ft.	FIRST-CLASS CERTIFICATE R.H.S.(Supply uncertain) —
82 Batemani (<i>Japan</i>), a beautiful Lily with rich glowing apricot-red flowers in August and September, ht. 3 ft.	per doz. 8/6 0 9

 " **purpureum**, a fine variety, bearing in abundance large handsome sweet-scented flowers, white tinged and spotted a vinous purple, and changing ultimately to a rich deep purple, ht. 3 to 4 ft. 2 0

× **LILY OF THE VALLEY, for Forcing, and making Plantations out of doors.**

The Berlin Forcing Crowns can be strongly recommended for general early forcing, to come in after Christmas. For flowering before and at Christmas we recommend the Retarded Crowns. For LILY OF THE VALLEY BEDS out-of-doors, and for massing in north borders, naturalising in woods, copses, etc., the Berlin Planting Crowns, Alexandra Crowns and Fortin's Crowns are recommended.

DIRECTIONS FOR FORCING BERLIN CROWNS.

Plant 15 to 20 crowns in a 5-inch pot, shaking in a little light soil amongst the roots, until they are tightly potted; leave the crowns free above the soil and a little below the rim of the pot. Place on bottom heat in a moist atmosphere, with a temperature of 80 to 85 degrees (if forced in March a temperature of 70 to 75 degrees will be sufficient), and cover the crowns with a little cocoa fibre or moss, which remove when top growth is showing. Tepid water should be frequently given, care being taken that it penetrates to the centre of the clump. To encourage simultaneously the development of flower and foliage, keep a flower-pot inverted over the crowns, until flower and foliage have made some progress, when gradually admit light. A dry atmosphere, or an insufficient supply of water at the roots, will cause the crowns, technically speaking, to go "blind." Where large quantities of Lily of the Valley blooms are required for cutting, the crowns should be planted rather thickly in boxes and receive the treatment described above.

OUTDOOR CULTURE OF LILY OF THE VALLEY.

Out-of-doors the Lily of the Valley likes a partially shaded and moist situation. The best results are obtained on a shady border against a wall, placing the crowns 6 to 9 inches apart and leaving them to establish themselves. The soil should be a good loam enriched with manure and a top dressing of old manure should be given annually. The plants should not be allowed to remain more than three years in one spot.

- × **Barr's Finest Berlin Forcing Crowns**, of finest selected quality, suitable for general early forcing.....per 1000, 60/-; per 100, 6/6
- × **Barr's Improved English "Alexandra" Crowns**, bearing sturdy spikes well clothed with large handsome bells; this strain is *especially suited for outdoor culture*, but may also be potted and very slowly forced in February or March (not earlier).....per 100, 8/6; per doz. 1/3
- × **Fine Selected Berlin Planting Crowns**, for outdoor beds, and naturalising in woods, etc.....per 1000, 42/-; per 100, 4/6
- × **Fortin Grand Giant Strain**, a very beautiful strain with remarkably large handsome bells on long sturdy stalks; the finest of all Lily of the Valley. The **flowering crowns** offered may be potted and brought on *very slowly* under glass, but they must not be potted or boxed up before March: ordinary forcing will cause them to go *blind*. Flowering crowns, per 100, 16/6; per doz. 2/4

Planting crowns (*especially recommended*) ,, 10/6; ,, 1/6

Retarded Crowns of Lily of the Valley for very early flowering, supplied from June to December. The earlier plantings of retarded crowns will give bloom in about three weeks, but the crowns started in November and December require a little more time. It is necessary that they be planted *as soon as received*, and grown on rapidly without any check. In June, July, and August all that is needed is to place them in a cold frame, and they come along quickly with very little attention. Later on, however, when the nights become cool, the temperature must be raised to that of the day. Failures sometimes occur with these retarded crowns in October, November, and December because they are not given the warmth they require at night.

The plants should be kept fairly dry overhead, and a warm moist atmosphere should be maintained. As the retarded crowns make a vigorous foliage it is advisable to remove one out of three leaves, as this will assist the development of the flower spike.

Crowns of finest quality, per 1000, 80/-; per 100, 9/- each—s. d

- × **LITTONIA modesta**, an elegant greenhouse climber, producing in abundance slender deep golden bell-shaped flowers. In warm situations plant outdoors in April 2 6
- × **LYCORIS**, handsome bulbous plants from China and Japan.
 - aurea**, a greenhouse bulb of great beauty, from China, bearing in October lovely umbels of golden-yellow flowers of elegant outline, ht. 1½ ft. Grow in a temperature of 65° to 70°, and while at rest in summer keep slightly dampper doz. 10/6 1 0
 - radiata alba**, a fine introduction from Japan, bearing on stout stems large umbels of spreading white flowers with a slight tinge of primrose at base of segments; a noble plant for the greenhouse, or out of doors under a south wallper doz. 25/- 2 6
 - sanguinea** (*new*), bearing from May to June umbels of 5 to 6 brilliant orange-red flowers for greenhouse or south walls, ht. 1½ ft.per doz. 21/- 2 0
 - squamigera** (*syn. Amaryllis Halli*), bearing in July umbels of 5 to 6 pretty pink flowers, with petals 3 to 4 in. long, the lower part being bright yellow, fragrant, ht. 2 ft.; for greenhouse or south wallsper doz. 21/- 2 0
 - „ **purea**, bearing in July umbels of 6 to 7 flowers like the above, but shaded brilliant purple, ht. 2 ft.; for greenhouse or south wall...per doz. 10/6 1 0
- × **MALVASTRUM Gilliesii** (*Modiola geranioides*), a charming hardy rock plant, profusely covered with crimson-purple flowers all the Summer, ht. ½ ft.per doz. 6/6 0 7
- × **MEDEOLA asparagoides** (*syn. Asparagus and Myrsiphyllum*), commonly called Smilax, a charming and elegant greenhouse plant for hanging-baskets, etc., producing spray-like branchlets of small glossy green foliage and orange-scented flowers; prized for cuttingper doz. 4/6 0 5

METHONICA superba. See *Gloriosa*.

each—s. d

× **MICHAUXIA campanuloides** (Michaux's Bell-flower), a stately plant for dry south borders, bearing in summer branching spikes of large rosy white blooms like Passion-flowers, ht. 3 ft. per doz. 4/6 0 5

MILLA (Triteleia).

× **biflora**, a beautiful Mexican species, bearing in August large pure white flowers of great substance, ht. 1 ft; the bulbs should be kept dry during winter and be potted up in early spring or planted out in March in a well-drained and sunny situation, per 100, 30/-; per doz. 4/- 0 5

uniflora (**Spring Star Flower**), a charming little hardy plant from Buenos Aires; flowers white, shaded blue, of delicate fragrance, ht. $\frac{1}{2}$ ft. Naturalised on grassy banks or on rockwork, this plant produces a lovely effect during April and May; it is also valuable for small beds and edgings. By gentle forcing in pots it may be had in bloom from January to February. A pretty room decoration can be obtained by growing *Milla uniflora* in saucers or bowls of live sphagnum moss.

per 1000, 18/6; per 100, 2/-; per doz. 4d. —

„ **violacea**, differs only from the above in the flowers being porcelain-blue, striped violet, ht. $\frac{1}{2}$ ft. per 1000, 15/6; per 100, 1/8; per doz. 3d. —

MODIOLA geranioides. See *Malvastrum Gilliesii*.

× **MONTBRETIA**, a family of most decorative hardy bulbous plants of elegant growth, and producing freely in early August graceful spikes of gorgeously coloured flowers, which are of the greatest value for cutting, lasting long in water and mixing well with all kinds of foliage. They may be grown in any ordinary flower-border enriched with manure, but prefer a sunny situation. As pot-plants they are charmingly graceful. Plant outdoors November to March, and the earlier plantings cover lightly with litter.

MONTBRETIA CROCOSMÆFLORA.

Pottsii, graceful branched spikes of medium-sized brilliant vermilion-scarlet flowers remarkably showy, ht. 2 ft.

x MONTBRETIA—grand new hybrids.

	each—s.	d
„ George Davison , a grand new seedling variety with very large handsome rich golden-yellow flowers, produced on long branching spikes, ht. 3½ ft. AWARD OF MERIT R.H.S., AUGUST 19TH, 1902	per doz.	12/6
„ Germania , a lovely hybrid of <i>Montbretia crocosmaeflora</i> and <i>Crocasma imperialis</i> ; it has the fine bushy habit of the Montbretias, grows nearly 4 ft. high, and produces in summer a profusion of graceful spikes, clothed with very large expanded flowers, measuring 3 to 3½ in. across, of a glowing orange-red with blood-red centre; a first-class plant for borders or cutting. AN AWARD OF MERIT was unanimously voted to this plant by the Royal Horticultural Society, July 30th, 1901	per doz.	4/6
„ Koh-i-noor , a very beautiful new hybrid; plants of fine erect habit, flowers very large and of a brilliant golden-orange, ht. 2½ ft.	per doz.	10/6

See also Novelty List, page 7.

MORPHIXIA (*syn. Ixia longiflora*).

Lovely little bulbous plants with the same graceful habit as the Ixia, but dwarfer, the flowers being long and tubular; they come into bloom later than the Ixias, and continue in flower a long time. These little gems should be given choice sunny spots on rockwork or front border.

	per doz.—s.	d
paniculata , flowers inside a beautiful buff colour, outside brick-rose	2	0
„ lutea , soft lemon, shaded buff, beautiful	2	0
„ rosea , deep rose and white	2	0

MUSCARI (Grape, Starch, Musk, and Feathered Hyacinths).

These lovely Spring Flowers require no special culture or soil. Naturalised on rockwork and grassy banks they look very beautiful, while as edgings and massed in the flower border they are most charming, and continue a long time in bloom, ht. 4 to 6 inches. We can strongly recommend them all for naturalisation.

“**Heavenly Blue**,” this lovely variety was sent us some years ago from Trebizond; the colour is of the brightest and richest shade of gentian-blue imaginable, and large masses produce a wonderful effect in the garden from the end of March to May; the flowers have a delightful fragrance, and are very valuable for cutting, having long stalks, and remaining fresh in water a long time. Awarded a Certificate of Merit by the Royal Botanic Society. (See Illustration, page 9.) ...per 1000, 60/-; per 100, 6/6

Armeniacum, ultramarine blue, very beautiful, succeeding *M. “Heavenly Blue”* in time of flowering

Azureum (*syn. Hyacinthus azureus*), bearing lovely little heads of Cambridge blue, early in February

„ **Freynianum**, numerous large spikes of turquoise-blue, very beautiful

„ **giganteum**, a grand tall robust-growing variety with large bold heads of deep blue flowers, handsome

„ **robustum**, a strong-growing variety of the beautiful *Azureum*, with larger flower-heads of a lovely Cambridge blue

Botryoides cæruleum (*Italian Grape Hyacinth*), bearing pretty little spikes of dark blue flowers; an old garden favourite used largely for small beds, edgings, and for naturalising

„ **album** (*Pearls of Spain*), pure white

„ **candidum**, white, tinged rose, beautiful

„ **pallidum grandiflorum**, pretty spikes of beautiful pale azure-blue, a lovely little plant

comosum (*Tassel Hyacinth*), forming at top of stem curious tassel-like heads of deep blue flowers

„ **album**, a pretty white variety, rare

Heldreichii (*The Greek Grape Hyacinth*), beautiful spikes of deep blue with white at mouth of bell

Masseyanum. See Novelty List, page 7.

Moschatum majus (*the Large Musk Hyacinth*), fragrant

Neglectum majus (*Starch Hyacinth*), blue-black, large and very early, remaining long in beauty

„ **carneum**, a pretty variety with flowers of a flesh-rose shade

Paradoxum (*The Caucasian Starch Hyacinth*), long handsome spikes of nearly pure black flowers, very handsome

Præcox, a very early miniature species with charming sky-blue flowers

Plumosum (*Ostrich Feather or Plume Hyacinth*), bearing large broad plume-like heads of a pretty mauve colour

MUSK HYACINTH. See *Muscari moschatum*.

NARCISSUS POLYANTHUS, or NOSEGAY DAFFODILS.

POLYANTHUS NARCISSUS, PAPER-WHITE "SNOWFLAKE."

The **Polyanthus Narcissi** or **Nosegay Daffodils** produce large heads of sweet-scented flowers, and are specially adapted for Winter and Spring decoration in pots and jardinetts, etc. The culture is the same as for Hyacinths. For flower beds and mixed borders they are great favourites, and produce a charming effect. Plant in October or November, and at the approach of winter give a light covering of long litter or other material to keep off severe frosts; remove the covering in March.

Where flowers are in demand from November to January, the **Paper White "Early Snowflake"** and **Double Roman Narcissi** are of great value for forcing with the Roman Hyacinths (see *Culture*, page 1).

Barr's Selections of Polyanthus Narcissi or Nosegay Daffodils.

For full Descriptive List of Narcissi or Daffodils, see **Barr's Daffodil Catalogue.**

NERINE—*continued.*

each—s. d

- Fothergilli major**, a grand plant, producing in early autumn large umbels of handsome crimson-scarlet flowers, ht. 1½ ft.per doz. 24/- 2 3
- marginata**.
pancratioides. } See Novelty List, page 8.
- sarniensis** (Guernsey Lily), a most brilliantly coloured Autumn flower of elegant form; colour vivid crimson-scarlet, sparkling in the sun as if bespangled with gold, ht. 1 to 1½ ft. per doz. 9/6 0 10
- sarniensis**, collected in Cape Colony, and said to vary in shade, per 100, 60/-; ,, 8/6 0 9
- undulata** (*syn. crispa*), rose-coloured flowers, petals elegantly curled, a little gem for the greenhouse, ht. ¾ ft.per doz. 8/6 0 9
- ORNITHOGALUM** (*Star of Bethlehem*), very pretty hardy bulbs, flowering in Spring and early Summer. ARABICUM and AUREUM should either be grown in pots or planted in a warm situation close to a south wall, at a depth of 6 inches. PYRAMIDALE, NUTANS, and UMBELLATUM are charming plants for naturalising in woodlands, meadows, etc.; the two latter will thrive in dense shade where few other plants will grow.
- arabicum**, handsome white flowers in June, with glistening black central boss and yellow anthers. Well-grown specimens produce heads bearing as many as 20 flowers, each measuring 2 inches across. Plant on warm sunny south borders, and slightly protect during winter; by *slight* forcing it may be had in bloom by Easter, ht. 1½ ft. After flowering the bulbs should be well ripened off, if out-of-doors, by placing a hand-light over them, or if in pots by exposing them to full sun*Guernsey-grown bulbs*, per doz. 2/6 0 3
- ” ” ” ” *Extra large bulbs*, ,, 3/6 0 4
- × **aureum**, a beautiful little species, with flowers of a rich apricot-orange colour, ht. 1 ft.; suitable for pot-culture or out of doors against a south wall, where the bulbs should be left undisturbed and have a light covering during winter .. per doz. 5/6 0 6
- lacteam** (*The Chickereeekie of South Africa*), a very lovely border plant with distinct spreading foliage and bearing a long elegant raceme of satiny white flowers with primrose-yellow anthers, lasting a remarkably long time when cut, ht. 1½ ft.; as a pot plant it is also prized 1 6
- × **longibracteatum**, a striking plant and very ornamental in pots for greenhouse and window decoration, ht. 1½ ft.per doz. 6/6 0 7
- montanum**, a very pretty dwarf species, with umbels of starry white flowers, ht. ¼ ft.; a most valuable bulb for massing and edgings, also useful for naturalising in grass, woodlands, etc.per 100, 5/6; per doz. 10d. —
- nutans**, elegant spikes of silvery grey flowers, outside shaded pale sea-green, beautiful; valuable for cutting and naturalising in woodlands, etc., ht. 1 ft.per 100, 4/6; per doz. 8d. —
- pyramidale**, a very beautiful bulbous plant, but little known; in Spring its large spikes of beautiful snowy white flowers are very attractive in borders, ht. 2 ft.per doz. 7/6 0 8
- umbellatum splendens**, a large handsome form of the old *Star of Bethlehem*, bearing umbels of pure white starry flowers effective in masses and edgings, valuable to naturalise, ht. 1½ ft.per 1000, 35/-; per 100, 4/-; per doz. 7d. —
- OSTROWSKYA magnifica**, a grand herbaceous perennial, bearing in summer immense bell-shaped flowers 6 inches in diameter, mauve to purple-blue, sometimes white, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S. Plant in a light well-drained gritty or sandy soil against a sunny wall, and slightly protect in spring.....*Strong roots which have flowered* 2 6
- ” ” ” ” *Smaller roots* 1 6
- OXALIS** (*Wood-Sorrel*), remarkably pretty little subjects for hot dry positions on rock-work, etc., in light soil; they make charming edgings. In winter they should be protected with light litter. The varieties marked γ bloom from June to Autumn, and planted in pots or pans they form decorative subjects for the greenhouse and sitting-room.
- γ **arborea alba**, flowers white, beautiful, ht. 8 inches; plant in Spring in cold frame or greenhouseper 100, 7/6; per doz. 1/3 0 2
- γ **Bowiei**, large brilliant rose flowers and elegant foliage, ht. ½ ft. ,, 4/6; ,, 8d. —
- cernua fl. pl.**, flowers double, canary-yellow, very pretty, ht. ½ ft. ,, 4/6; ,, 8d. —
- ” **var. bermudiana** (*The Bermuda Buttercup*), a charming bulb for Winter flowering indoors, producing elegant terminal clusters of graceful bright yellow flowers for weeks. Pot up early and keep in a dark cool position for a few weeks to root well, and then remove to a sunny window, or greenhouse; the bulbs may also be potted later, kept in a frame, and planted out in spring.....per 100, 12/6; per doz. 1/9 0 2
- γ **floribunda**, flowers rose-coloured, with dark veins, produced in profusion for many months, ht. 8 inches per 100, 8/6; per doz. 1/3 0 2
- γ **lasiandra**, very handsome and distinct, with large deep green leaves and woolly stems, and umbels of rosy crimson flowers, ht. 9 inchesper 100, 3/6; per doz. 6d. —
- PÆONIES, Double and Single Chinese.** *Plant in September and October.*
See our **Hardy Plant Catalogue.**
- PÆONIES, Double and Single European.** These bloom in May and are remarkably decorative. *Plant in September and October.* See our **Hardy Plant Catalogue.**

- × **PANCRATIUM calathinum.** See *Hymenocallis*, page 41. each—s. d
- canariense**, flowers white and very fragrant, ht. 1½ ft. 1 6
- illyricum**, beautiful white flowers, with long filamentous outer segments. A fine pot-plant, or for planting under a south wall, ht. 2 ft. *Large bulbs*, per doz. 10/6 1 0
- ” ” ” *Extra large bulbs*, ” 15/- 1 6
- maritimum** (The Sea Daffodil), flowers white and delightfully fragrant; a handsome plant for pot-culture, or to plant under a south wall, ht. 1½ ft. per 100, 25/-; per doz. 3/6 0 4
- PARDANTHUS chinensis** (The Chinese Leopard-Flower), bearing in Summer handsome showy star-shaped flowers, orange with crimson-black spots, ht. 2 ft.; hardy in sheltered sunny situations, such as under a south wall..... per doz. 8/6 0 9
- × **PHÆDRANASSA** (Queen Lily), handsome and showy bulbous plants from the Andes; they may be grown in pots or out of doors under a south wall, planted at the depth of 5 or 6 inches. April to June-flowering.
- chloracea**, yellow, very fragrant, ht. 1½ ft.per 100, 21/-; per doz. 3/- 0 4
- schizantha**, vermilion, tipped yellow and green, ht. 1½ ft. ” 5/6 0 6
- ventricosa**, scarlet, with protruding anthers, ht. 1½ ft. ” 5/6 0 6
- × **PHILADELPHUS** (The Mock Orange or Syringa of Gardens), new dwarf varieties, valuable for early forcing in greenhouse; when covered with their beautiful fragrant white flowers they form a charming picture.
- Lemoinei Avalanche**, bearing graceful drooping sprays of large handsome snowy white flowers, ht. 2½ ft. 1 6
- ” **Boule d'Argent**, flowers very large and free, ht. 2 ft. FIRST-CLASS CRT. R.H.S. 1 6
- ” **erectus**, having an erect habit and bearing large handsome sprays of bloom. AWARD OF MERIT R.H.S., ht. 2½ ft..... 1 0
- microphyllus**, flowers small, of pretty graceful habit, ht. 3 ft. 1 0
- POLIANTHES tuberosa.** See *Tuberosa*, page 71.
- POLYANTHUS Narcissus.** See *Narcissus*, page 62.
- × **POLYGONATUM** (Solomon's Seal, or David's Harp), very graceful shade-loving plants, valuable for naturalising in woodlands, wild gardens, shady borders, etc.
- macrophyllum**, a handsome large-leaved variety, ht. 2 ftper 100, 15/-; per doz. 2/3 0 3
- multiflorum**, the Tall Solomon's Seal, a fine bold plant of graceful habit, having arching stems of pendent white flowers, ht. 2 ft.per 100, 10/6; per doz. 1/6 —
- officinale**, the Dwarf Solomon's Seal; its graceful habit and elegant white flowers render it a valuable pot-plant for early forcing; it is equally prized for shady herbaceous borders and naturalising in woodlands, etc., ht. 1 ft.per 100, 10/6; per doz. 1/6 —
- stellatum** (true), a very elegant plant producing from the axils of the leaves pretty clusters of white flowers, ht. 1 ft.per 100, 21/-; per doz. 3/- 0 4
- Thunbergii**, bright shining green broad foliage, and clusters of large waxy white pendent flowers, tipped green, on arching stems, ht. 1½ ft.....per 100, 21/-; per doz. 3/- 0 4
- verticillatum** (true), a very distinct tall-growing species producing numerous whorls of foliage and cream-coloured flowers, ht. 2½ ft.per 100, 21/-; per doz. 3/- 0 4
- PRIMROSES—JAPANESE—Varieties of Primula Cortusoides (Sieboldi).**
- A charming hardy class of Primulas, bearing large bold heads of graceful flowers, in colour ranging from pure white, blush-pink, and soft rose to the most intense crimson, delicate mauve, and lavender-blue. They thrive in any shady sheltered border or shady parts of the rock-garden, and as pot plants for the cool greenhouse have few rivals in the spring and early summer months.
- 100 in 10 beautiful named varieties35/-
- 12 ” 12 ” ” ” ” 5/6 & 7/6
- Beautiful named varieties in mixture for massing ...per 100, 32/-; per doz. 4/6
- PUSCHKINIA libanotica compacta** (Lebanon Squill), a beautiful little April-flowering bulb, prized for the permanent flower border and for rockwork; it is also a lovely indoor pot-plant (6 bulbs in a pot); the flowers are white, shaded and striped soft clear blue, ht. 6 inches per 1000, 42/-; per 100, 4/6; per doz. 8d.
- RANUNCULUS, Turco-Persian, Turban and Persian**, ht. ¾ ft.

Nothing produces a brighter or more gorgeous effect in May and June than beds of Ranunculus; the flowers are all good for cutting, and the culture is very simple. They will grow in any ordinary flower border enriched with manure.

CULTURE.—Plant from October to February, 3 or 4 inches apart, selecting a dry day; press the tubers firmly into the soil, *claves downwards*, and cover them with sand, then with soil, keeping the crown of the tuber two inches under the surface. After planting cover the ground with *long straw, cut heather, or other light material*, which remove in March. In April and May, during dry weather, *water the beds freely*, and a plentiful crop of fine flowers will be the result. If grown as pot-plants put three tubers in a 4-inch pot, and plunge out of doors for a time.

RICHARDIA—continued.

each—s. d

- aurata**, flowers pale yellow, foliage spotted per doz. 5/6 0 6
- hastata** (**Pride of the Congo**), fine yellow flowers, with black centre and white-spotted foliage per doz. 6/6 0 7
- leucoxantha**, a fine greenhouse variety with white and yellow flowers 5 6
- Pentlandii**, the **Large Golden Arum Lily**, a noble plant with handsome deep green foliage, generally unspotted and large rich golden-yellow flowers with reddish petioles and black central blotch *Strang Tubers* 7 6
- Elliottiana**, the **Large Golden Arum Lily, with Spotted Foliage**, a noble plant with handsome golden flowers and prettily spotted foliage *Strang Tubers* 7 6
- Rossi**, beautiful canary-yellow flowers, with handsome violet-blotched centre 2 6
- Solfatare**, a handsome hybrid Arum Lily, a cross between *R. Adami* and *R. Rossi*, flowers large, primrose with black centre, a vigorous grower 3 6

- Bulbocodium**, flowers rose-lilac with yellow throat, very pretty per doz. 4/6 0 5
- " **var. nivalis**, a charming variety from Asia Minor, flowers pale lavender-blue shading to white, striped bronze outside and with bronzy yellow centre per doz. 5/6 0 6
- Clusii**, a beautiful species, dark lavender, with brilliant orange centre, ht. $\frac{3}{4}$ ft. per 100, 7/6; per doz. 1/3 0 2
- Columnæ**, flowers whitish, veined purple and with yellow centre " 5/6 0 6
- speciosa**, deep satiny carmine, a little gem, ht. $\frac{1}{2}$ ft. per 100, 4/6; " *Sd.* —
- ROSES for Autumn Planting.** See page 91.
- × **SALVIA patens**, brilliant Gentian-blue, ht. 2 ft. } Handsome border plants require } doz. 5/6 0 6
- × " " **alba**, pure white, ht. 2 ft. ... } ing culture similar to Dahlias. } " 6/6 0 7
- × **SANDERSONIA aurantiaca**, a very beautiful tuberous-rooted stove or greenhouse climber, with orange-coloured bell-shaped flowers *Supply uncertain*
- SANGUINARIA canadensis** (**Blood-root** or **Puccoon**), a very charming spring-flowering hardy plant with a pretty glaucous Colt's-foot-like foliage and flowers measuring an inch across, pure white with a tassel of yellow stamens, ht. $\frac{1}{2}$ ft.; suitable for shady spots, rather moist peaty soil per doz. 5/6 0 6
- SCHIZOSTYLIS coccinea** (**Caffre Lily** or **Crimson Flag**), a valuable hardy Cape plant, producing in Autumn an abundance of spikes, covered with showy rich scarlet flowers, prized for cutting; it delights in a sheltered situation among trees and shrubs; ht. $1\frac{1}{2}$ ft. per 100, 10/6; per doz. 1/6
- SCILLAS—Early-flowering.** The effect in early Spring can hardly be overestimated of the intense brilliant blue of *Scilla sibirica*, and the deep-blue of *S. bifolia*, contrasting with the snowy whiteness of the Snowdrop and varied hues of the Crocus. As edgings and masses in beds and borders they are most valuable. *Bifolia* is the first in bloom, followed by *Sibirica* and *Amœna*. All suitable for naturalisation and permanent flower borders. In pots or jardinetts, alone or with other bulbs, they form a pleasing variety amongst indoor plants.
- Sibirica** (**The Siberian Squill**), producing spikes of bright blue flowers, ht. 3 in. per 1000, 27/6; per 100, 3/-
- " *Extra large bulbs*, per 1000, 45/-; per 100, 5/-; per doz. 9d.
- " *A few gigantic bulbs* " 8/6; " 1/3
- " **alba**, flowers pure white, very beautiful, should be associated with the blue variety, ht. 3 inches per 1000, 50/-; per 100, 5/6; per doz. 10d.
- " **taurica**, a most valuable *Scilla*, blooming two weeks earlier than *Sibirica*, with flowers of a beautiful rich light hyacinth blue, ht. 3 inches per 1000, 45/-; per 100, 5/-; per doz. 9d.
- Amœna**, a very handsome species, resembling *Sibirica* but flowering later, and bearing spikes of rich dark blue flowers and broad foliage, ht. 1 ft.; it likes a sunny position in light soil per 100, 7/6; per doz. 1/3
- Bifolia**, of the *Taurus Mountains*, producing dainty little heads of deep blue flowers, very dwarf; a charming early Spring flower, valuable for masses and edgings in borders and on rockwork per 1000, 30/-; per 100, 3/6; per doz. -/6
- " *Extra strong bulbs* " 4/6; " -/8
- " **alba**, bearing elegant little heads of pure white flowers, beautiful per 100, 15/-; per doz. 2/3; each 3d.
- " **carnea**, with heads of pretty pale flesh-rose flowers, *scarce* per 100, 12/6; per doz., 1/9; each, 2d.
- SCILLAS, Various Species.** *Peruviana* and *Ciliaris* are giant Summer-flowering *Scillas*, and grand border plants. *Autumnalis japonica* has beautiful rose-coloured flowers, and blooms in August and September. *Italica* and *Odorata* are beautiful on rockeries and in flower borders. *Verna* is a gem for naturalising on rockwork and banks.

SCILLAS (Wood Hyacinths) — May-flowering. Our native species (*Scilla nutans*), with its long pendent bells, abounds in most parts of the country, and many suppose it to be the "Culver keys" referred to by Izaak Walton. The fine Spanish varieties (*S. hispanica*) have erect flower-spikes and open campanulate flowers. *Scilla patula* and its varieties have a robust tall habit with large campanulate open flowers. All are very effective in flower and shrubby borders, and most valuable for wild gardens and woodlands, where they should be largely naturalised; they seed freely and quickly establish themselves. They also make charming pot-plants, and may be forced into bloom by March. *The white varieties* are greatly in demand to cut for table bouquets and vases. **Wood Hyacinths** succeed in shady flower borders and bare shady places, and odd corners which often have a desert-like appearance in the flower garden can by their use be rendered bright and cheerful. They will also thrive under fir and pine trees where few other plants will grow. Plant 6 inches deep to obtain fine flower-spikes.

SPIRÆA (The Meadow Sweet), for Forcing or Planting Out.

The large graceful feathery pure white fragrant flowers of *Spiræa japonica*, **compacta multiflora**, and **Astilboides** are most valuable for furnishing vases, while the plants are amongst the most decorative for the greenhouse and sitting-room. In forcing, a *moist atmosphere* and *abundance of water* at the roots are necessary. The pots therefore should be stood in saucers of water. *Spiræa palmata* and its varieties are very beautiful. In *shady or moist borders out of doors*, and at the margin of streams and ponds, the Spiræas are all very decorative plants.

All The Spiræas we offer are all good clumps.

per 100, 12/6; per doz. 1/9 o 2

TECOPHILÆA cyanocrocus (Chilian Crocus), a most beautiful Chilian Spring-flowering bulb, bearing large Crocus-like flowers ranging from dark to light blue with white throat, delicately scented. It is a gem for warm dry sunny situations on rockwork, or under a south wall, ht. $\frac{2}{3}$ ft.....per doz. 36/- 3 6

THALICTRUM Delavayi. See Novelty List, page 8.

- × **THLADIANTHA dubia**, a rapid-growing climber for covering trellises, arbours, etc., with heart-shaped bright green leaves and bright yellow flowers during Summer... per doz. 3/-; each 0 4
- × **TIGRIDIA Pavonia (The Tiger Flower of Mexico.)**

Few flowers are more gorgeously coloured or so beautiful. The bulbs are supplied from December to May; for indoor decoration, pot up as soon as received and plunge in a cold frame, withholding water till the foliage appears, then giving sparingly at first. Those bulbs intended for outdoors should be stored in dry soil or peat, away from frost, till March, and then be planted in sunny positions in the flower border in well-drained soil, the bulbs being surrounded with sand. Beds of Tigrdias make a gorgeous picture during July, August, and September, and should be made a special feature of in all gardens.

12 bulbs each of 6 varieties of Tigrdia, 10/6; 6 bulbs each, 5/6

"ENCELSIOUR PEARL" TUBEROSE.

- × **speciosum**, bright vermilion-scarlet flowers in clusters, quite hardy; grow in northern aspect or shady position, and in a moist soil. Orders booked for delivery in Spring, when the plants are starting into growth...*Established pots, full of roots*, per doz. 7/6 & 10/6; 9d., 1s. & 1 6
 - × **tuberosum**, flowers yellow and red, very showy; plant in Spring and lift in Autumn; the roots are eaten by the natives of Peru, and have been found, in this country, to form an agreeable dish when boiledper doz. 3/6 0 4
 - × **TUBEROSE**. This valuable sweet-scented flower is too well known to need description. For early flowering pot the bulbs as soon as received, and plunge the pots in a temperature of about 60 degrees. The bulbs for succession keep dry, or pot at once to make root growth; in either case the temperature should not be below 50 degrees, or the bulbs will suffer.
- Double American Dwarf, "Encelsior Pearl,"** the finest strain, having large pure white double flowers of delicious fragrance...*Orders booked for supply from January to May* ...per 103, 12/6; per doz. 1/9 0 2

BARR'S FAMOUS TULIPS.

Awarded Five Gold Medals by the Royal National Tulip Society, and many Silver Medals and Prizes at the London Spring Flower Shows.

Tulips are extremely hardy, and of easy culture, flowering freely in either sunny or shady situations, and developing their handsome showy flowers even in a confined town garden. By a judicious selection of Single, Double, and May-flowering Tulips, a most brilliant display of colours may be maintained in the garden from early April to end of May. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the Tulips, *Scilla sibirica*, *Chionodoxas*, *Snowdrops*, and *Crocuses*; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip. Our large breadths of Tulips at the **Surbiton Nurseries** in Spring create much comment, and elicit the greatest admiration from all who see them.

BARR'S EARLY SINGLE TULIPS.

Plant from October to November.

Those alone who have massed the different varieties of **Single Tulips** (*planting the bulbs 4 inches apart*) can form an idea of their great beauty and rich diversity in shade and colour, and the grand effect they produce grouped in flower beds or borders. The **Single Tulip** is extensively grown for indoor decoration (three or five bulbs in a pot) and *cultivated in the same way as the Hyacinth* for early flowering and succession.

The varieties of the little early **Duc Van Thol Tulips** (with exception of the *scarlet, edged yellow variety*, which flowers first) bloom together, and are of the same height, which renders them valuable for beds and borders, where a very early Spring display is required, also for early forcing with the Roman Hyacinth, etc.

Hints as to the arrangement of Early Tulips in beds, etc.—A difficulty is often experienced by Amateurs in knowing what kind of Tulips to select to bed together, seeing that they are not all the same height, and that some are earlier in flower than others. For the assistance, therefore, of purchasers we have taken special observations at our Nurseries as to the heights and the order in which the **Early Single and Double Tulips** flower.

The Heights we give in inches, and the order of flowering is indicated by (1), (2), (3), (4), or (5) after the name. It will be noticed that the **Double Tulips** generally are a little later-flowering than the Singles. The difference in time of flowering between each number is not great, so that (1) and (2) may be bedded together, also (2) and (3), and so on. The varieties of **Duc Van Thol** are not numbered, as they flower before any of the others.

Arrangement of Colours in Bedding.—The following varieties if bedded together produce charming effects: *Princess Marianne*, *Ophir d'Or* and *Wouwerman*; *Pottebakker White* and *Chrysolora*; *Prince of*

BARR'S EARLY SINGLE TULIPS—continued.

Austria, President Lincoln and Chrysolora; Rose Grisdelin and Princess Marianne; Pottebakker Yellow and Thomas Moore; Chrysolora and Dusart; Princess Ida and Rosamundi; Duchesse de Parma and Fabiola; Rosamundi and Rose Superbe; Couleur Cardinal makes a grand show bedded by itself, but Snowdrift goes well with it; Keizerskroon makes a fine bed with Queen Victoria as an outside border.

Single Tulips suitable for Forcing.

The following varieties may be forced for decoration at **Christmas and early January**: *Duc Van Thol varieties, Mon Trésor, Pottebakker White, Prosperine, and Vermilion Brilliant.*

For decoration from the **end of January to early March** the following kinds should be used: *Duchesse de Parma, Joost Van Vondel, La Belle Alliance, Pottebakker White, Primrose Queen, Prince of Austria, Queen Victoria (La Reine), Rose Grisdelin, Thomas Moore, Vermilion Brilliant, and Yellow Prince.*

For later forcing, to come in the **latter part of March and early April**, the following sorts are best: *Couleur Cardinal, Duchesse de Parma, Joost Van Vondel, Keizerskroon, La Belle Alliance, Pottebakker White, Pottebakker Yellow, Prince of Austria, Prince de Ligne, Rosamundi, Rose Grisdelin, Rose Luisante, Rose Superbe, Vermilion Brilliant, White Swan, and White Hawk.*

☞ For general directions for treatment of bulbs in pots, see page 1.

Soil and Time of Planting.—Any ordinary garden soil enriched with old stable manure, with a sprinkling of quicklime dug in while fresh, suits the Tulip. Planting out of doors should take place from October to November, not earlier.

Barr's Selected Single Tulips for Bedding.—Suitable to plant separately or to bed together.

BARR'S DOUBLE TULIPS.

Plant from October to November.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, etc., also as edgings to beds of Roses and Rhododendrons and to shrubberies. Planted in groups of five or more, they are very attractive. *Plant the bulbs four to six inches apart.*

Time of Flowering.—The numbers in brackets after the name indicate the order of flowering, and will assist amateurs in making their selections for bedding, thus:—(1) corresponds in time of flowering with (1) of the **Single Tulips**; (2) corresponds with (2) of the **Single Tulips**, and so on. The heights, as registered at our Nurseries, are given in inches. By a judicious selection of Double and Single Tulips, a display of brilliant colours may be maintained in the garden for a long period.

Double Tulips should be planted three bulbs in a pot, and receive the cultural treatment recommended on page 1.

DOUBLE TULIPS SUITABLE FOR FORCING.

To force for earliest decoration, say **January**, *Salvator Rosa* may be used; the other varieties do not force successfully so early.

For decoration from the **end of January to early March** we can recommend the following sorts:—*Couronne d'Or, El Torcadore, Imperator Rubrorum, Lady Palmerston, Murillo, Princess Beatrice, Tournesol, Tournesol Yellow*, and *Titan*.

For late forcing, to produce blooms from **end of March to early April** the following kinds should be grown:—*Couronne d'Or, Imperator Rubrorum, La Candeur, Le Matador, Murillo, Tournesol*, and *Tournesol Yellow*.

Variegated-leaved Tulips.—FOR BEDS, EDGINGS, AND BORDERS.

These are all of great beauty, the handsome variegated foliage providing a decoration from early Spring to Summer. The flowers also are handsome and showy.

Selection of 8 beautiful varieties, 3 bulbs of each, 6/-
Mixed Varieties, per doz. 2/6

BARR'S**Beautiful "Cottage" Tulips and Tulip Species**
(All Single and mostly May-Flowering).

The name **Cottage Tulips** we have given to the various beautiful May-flowering Tulips which have mostly been found growing in old cottage gardens in England, Scotland, and Ireland, where they have been in some cases for over fifty years. They are all very beautiful, presenting a great variety in form and colouring, and having none of the stiffness of other Tulips. On account of their extreme hardiness they are specially adapted for permanent hardy flower borders, where they should be freely planted in large clumps and masses. They may also be naturalised in grass, wild gardens, etc., where during May they present a gorgeous appearance. The bulbs should be planted an inch or two deeper than the Early Single and Double Tulips. Those who have visited **Kew Gardens** in Spring will have noticed these Tulips planted freely in grass, and also used largely in *filling flower beds* on the lawns.

For cutting they are greatly prized, as the stems are long and a free graceful effect can be readily obtained by their use.

In most cases we give the heights as registered at our **Surbiton Nurseries**, but these will vary somewhat according to richness or poverty of soil.

Time of Flowering.—The Cottage Tulips take up the succession of flowering as the Early Single and Double Tulips are going out of bloom. As far as possible we have indicated the order of flowering by (1), (2), and so on. (1) will correspond in time of flowering with (5) of the Early Single and Double Tulips. The Parrot Tulips bloom together with those marked (2), and the Darwin with those marked (3) and (4) in the following lists.

Those Tulips marked Φ are species and gems for choice corners in the rock garden, where their lovely flowers will delight the eyes of all who see them.

BARR'S GRAND DARWIN TULIPS
(May-flowering).

As grown at our Surbiton Nurseries, and exhibited at the London May Flower Shows, where their grand stately flowers elicit the admiration of all.

On May 11th, 1900, Her late Majesty Queen Victoria graciously accepted a basket of our handsome Darwin Tulips on the occasion of the Drawing-Room at Buckingham Palace, the stately beauty of the flowers eliciting much admiration.

For flower beds and borders we confidently recommend the following Darwin Tulips for their stately bearing and rich colours. They have been specially selected as being distinct, showy, and beautiful, so that buyers need have no hesitation in choosing the colours they require, as all are good. The cut flowers form an elegant decoration for vases, and last a long time in water.

By gentle forcing in pots these grand Tulips may be had in bloom by March, and will be found of great value for indoor decoration on account of their lovely soft colours and tall stately bearing. The centres of many are most beautifully marked.

In most cases we give the heights as registered at our Nurseries last Spring, also the order of flowering in relation to the flowering period of the Cottage Tulips, (1) being the first to open and (5) the latest.

A FIELD OF BARR'S GRAND DARWIN TULIPS AT THEIR SURBITON NURSERIES.

BARR'S FINE MIXED Darwin Tulips , containing a good variety of colours and suitable for massing in wild gardens, etc.per 1000, 50/-	5	6...0	10... —

REMBRANDT TULIPS (May-flowering).

These are Darwin Tulips which have broken into a permanent variegation. The flowers are beautifully striped and blotched, and remarkably attractive in flower beds and borders. They range in height from 18 in. to 25 in. Barr's Beautiful Mixture, per 100, 25/-; per doz. 3/6

PARROT, or DRAGON TULIPS, with Laciniated Petals (May-flowering).

These Parrot, or Dragon Tulips, have large characteristic blossoms with curiously laciniated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets the drooping flowers look like orchids. In height they average about 15 inches, and bloom with the Cottage and Darwin Tulips.

The following are all selected extra strong bulbs, superior to what are often sold, and may reasonably be expected to bloom; but as in some seasons the Parrot Tulips are rather shy in flowering, to ensure a good display in flower beds and borders it is wise to plant the bulbs only 4 inches apart.

12 bulbs each of 6 beautiful varieties, 7s. 6d.; 6 each, 4s.

	per doz.—s. d		per doz.—s. d
Amiral de Constantinople , glossy scarlet, shaded and tipped orange, showy per 100, 6/6	1 0	Fire King , a fine new variety, dark scarlet, striped gold, distinct and remarkably handsome.....	per 100, 15/- 2 3
Coffee-Colour , shaded reddish brown on a yellow ground, slightly striped crimson and greenper 100, 7/6	1 3	Large Yellow , pure yellow, slightly striped crimson and green, a showy and beautiful flowerper 100, 6/6	1 0
Crimson Beauty , rich deep blood-crimson, with blackish markings, flowers of immense size and very handsome; this variety should be largely used in beds, borders, and baskets, as nearly every bulb flowers freely and produces a most brilliant effect. CERTIFICATE OF MERIT, R.B.S., 1897.....per 1000, 70/-; per 100, 7/6	1 3	Markgraaf Van Baden (true), golden inside, outside shaded and feathered brilliant scarlet, purple and green, very handsome and showyper 100, 10/6	1 6

Established in pots, per doz. 21/-, 30/- & 42/-; each 2/6, 3/6 & 4 6

VELTHEIMIA viridifolia, a very handsome and characteristic plant for cool greenhouse, having elegantly undulated glaucous green foliage, and producing from February to March elegant heads of Lachenalia-like flowers, colour rose and green on handsome purplish stems, ht. 1½ ft. per doz. 15/- 1 6

× **WATSONIA**, very ornamental and showy bulbous plants, which may be grown in pots for the cool greenhouse or be planted outdoors in a warm sunny situation, plenty of water being given while in growth.

Ardernei, bearing elegant spikes, 2½ ft. to 3 ft. high, of beautiful large snowy white flowers in Summer; a lovely plant for pots in cool greenhouse, or for sunny warm situations out of doors, where it can be given an abundance of water while in growthper doz. 10/6 1 0

coccinea, bearing in Summer handsome spikes of bloom of a gorgeous vermilion colour, on a reddish brown stem, ht. 1 ft.per 100, 15/-; per doz. 2/3 0 3

rosea, bearing elegant spikes of beautiful bell-shaped rose-coloured flowers, ht. 2 ft. ,, 10/6 1 0

WINTER ACONITE, its golden blossoms early in Spring are very beautiful, resting on emerald green cushions of leaves, produce a charming effect in February, especially when associated with Snowdrops, Early Scillas, Chionodoxas, Anemone fulgens, Anemone apennina, etc. Under trees and in moist situations, where few other plants will thrive, the Winter Aconite luxuriates, and densely clothes the ground with its bright green foliage long after the flowers have disappeared. It is a good useful plant to naturalise in grass, etc.

BARR'S SELECT LIST OF STRAWBERRIES.

We have made a careful selection, as offered below, of the very best and most distinct varieties of Strawberries, and feel confident that they will give the greatest satisfaction. For forcing, *President*, *Royal Sovereign*, and *Vicomtesse Héricart de Thury* should be used.

Well-rooted Runners, supplied from August. *Less quantities than 50 are charged at a little higher rate.*

	per 100—s.	d
Royal Sovereign , a grand variety both for forcing and open-air culture, bearing very large handsome conical-shaped fruit of luscious flavour, flesh firm and white, continuous cropper ...	3	6
Vicomtesse Héricart de Thury , a great and continuous cropper, fruit of medium size, rich in flavour, and valuable for preserving, a good early forcer	4	6

FOR MAIN CROP.

British Queen , very large, of exquisite flavour, requires good cultivation in <i>heavy soil</i>	6	6
Countess , very handsome dark crimson fruit of extra fine flavour, moderate cropper.....	6	6
Dr. Hogg , large and handsome, <i>one of the best flavoured Strawberries in cultivation</i> , requires good culture and likes a heavy soil	6	6
Fillbasket (Laxton's) , handsome bright-red pointed fruit of fine flavour, free bearer	6	6
Kitley's Goliath , a grand successional bearer, fruit with tender flesh of fine sugary pine flavour	4	6
Louis Gauthier , a fine new variety, producing an enormous crop of pale pink fruit of pleasant pine flavour; the new runners, if stopped beyond the first stolon and left undisturbed, produce a second crop of fruit in autumn	6	6
President , large and handsome, of richest pine flavour, heavy cropper, and valuable for general garden and main crop forcing; it retains its flavour and carries well	5	6
Reward (new) , one of the best main crop varieties, resembling rather British Queen , with very large wedge-shaped fruit, of firm flesh and bright colourper doz. 3/-	20	0
Sir Charles Napier , large and prolific, of refreshing flavour, carries well, <i>prefers a light soil</i> ; plant 2 ft. apart.....	3	6
Sir Joseph Paxton , handsome solid fruit of delicate flavour, very prolific, a <i>favourite market variety</i> , as it is hardy and travels well	3	6
The Bedford , bearing a good crop of handsome round fruit of finest flavourper doz. 2/-	12	0

LATE.

Filbert Pine , a fine late variety producing a heavy crop of orange-red fruit, of rich brisk flavour; a robust grower, and good for light soils.....	4	6
Frogmore Late Pine , fruit large, of extra fine pine flavour, a <i>connoisseur's fruit</i> ; it requires good cultivation, and should be grown under a north aspect	6	6
Givon's Late Prolific , the <i>finest late Strawberry</i> , bearing a heavy crop of very large dark red fruit, firm and of rich brisk flavour	6	6
Queen of Denmark , a valuable late variety, bearing dark mulberry-red small fruit of rich aromatic flavour, good sturdy grower	6	6

VERY LATE.

Eleanor , a fine free-growing large variety, producing enormous successional crops	4	6
Waterloo , very large dark fruit, conical in shape, valuable for dessert; it carries well, and may be forced as a last crop	6	6
Laxton's Latest (new) , a grand variety with enormous fruit of a fine deep crimson, after Waterloo but having a richer pine flavour	per doz. 3/-	20 0
President Loubet (new) , a seedling from Waterloo with very large fruit of rich pine flavour	per doz. 1/6	10 0

Strawberry Plants in Small Pots.

To fruit first season outdoors or for shifting into large pots for forcing ...per 100, 17/6; per doz. 2/6

TRUE ALPINE AUTUMNAL STRAWBERRIES. Well-rooted Runners.

In growing these for Autumn cropping, remove the Spring blossoms in order to induce the plants to make runners, as these last produce the best fruit. *We enumerate three of the best varieties.*

	per 100—s.	d
Belle de Meaux , producing large red berries of rich flavour	4	0
Bergeri , fruit rich crimson, free bearer	4	0
Millet (new) , a fine variety, the fruit, as exhibited in France, measuring 2½ in. long, vigorous grower.....	5	0

NEW HYBRID PERPETUAL-FRUITING STRAWBERRIES.

These valuable hybrid Strawberries commence fruiting in Summer, and continue producing until frost sets in. If grown in pots and removed indoors early in September the plants fruit freely till late in Autumn. Feed the plants freely during dry weather.

St. Antoine de Padoue , the largest fruited of these hybrid strawberries, bearing globular bright red fruit of fine flavour; the most vigorous grower. AWARD OF MERIT R.H.S.	per 100—s. d	6 6
Saint Joseph , a most productive variety, fruit of medium size, flesh red, very sweet and melting and rich in flavour. AWARD OF MERIT R.H.S.		5 6

ROSES FOR AUTUMN PLANTING.

Selected Standards and Half-Standards , finest named sorts, our selection, including Teas, Hybrid Teas, and Hybrid Perpetuals	per doz.	21/-, 25/- & 30 0
„ Dwarfs or Bush Roses , finest named sorts, for beds and borders, including Teas, Hybrid Teas, and H.P.'s, our selection	per doz.	9/-, 12/- & 18 0
„ Climbing Roses , in named varieties	per doz.	12/- & 15 0
„ „ „ „ „ <i>extra strong plants</i> , each		2/6, 3/6 & 5/6
Tea-scented Roses in Pots „ „	per doz.	15/-, 21/- & 30 0
„ „ „ „ „ <i>extra strong for forcing</i> , per doz.		30/- & 42 0
Crimson Rambler , a most robust-growing Polyantha Rose, producing dense masses of small double bright crimson flowers in large trusses during Summer; very hardy and invaluable for arbours, pillars, arches, etc., but not recommended for walls. Do not prune in Spring, but early in Autumn remove all weak and very old wood, and thin out the growth to three or four, leaving only the strongest shoots	each	1/6; extra strong 2 6

A Select List of the best Climbing Roses will be found in our **Hardy Plant Catalogue**.

USEFUL TOOLS FOR BULB PLANTING, Etc.

Barr's Special Bulb Planter (Regd. 368338) specially designed for planting bulbs in grass. At every operation it lifts a clean circular little sod of grass, which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been put in.

Rd. 368338
BARR'S BULB PLANTER.

A time must be chosen for planting when the ground has become softened after early Autumn rains and not when in a hard and baked condition, as it is then impossible to use this, or indeed any other, tool with success. By the use of BARR'S SPECIAL BULB PLANTER a large quantity of bulbs may be planted in a very

short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting-edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2 inches diameter }
 „ „ „ 2¼ „ „ } 10/6 each.
 „ „ „ 2½ „ „ }

We shall send the medium size (2½ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber (Regd. 468878), specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6¾ lbs., length 36 inches over all. 9/6 each.

Rd. 468878.
BARR'S BULB DIBBER.

Barr's Special Bulb Trowel, made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

Garden Trowel, solid cast steel, finest quality, 5 in., 1/2; 6 in., 1/3; 7 in., 1/6 each.
 „ „ riveted steel, good quality, 5 in., 6d.; 6 in., 7d.; 7 in., 9d.
Fern Trowel, bright steel, best English make, 2/- each.
 „ „ „ „ „ with leather sheath, 2/9 each.

SET OF LADIES' GARDEN TOOLS (Parkes' best quality), CONTAINING :—

Solid cast steel Spade, 5½ in. by 9 in.; cast steel Fork, 4 pronged; light American-pattern Rake, 8 teeth, well-handled; Draw Hoe, cast steel, well-handled, 6 in.; 12/6 per set.

For a fuller list of Tools and other Garden Requisites, see Barr's Seed Guide, free on application.

per 100, 4 in., 8d.; 5 in., 10d.; 6 in., 1/-; 7 in., 1/3; 8 in., 1/6; 9 in., 2/-; 12 in., 3/-

“ ” **for suspending**, painted white, superior quality, 4 in., per 100, 9d.; 6 in., per 100, 1/-
very stout, best yellow deal, planed and pointed, tarred bottoms 14 in. long, 1½ in. wide, ½ inch thick, same as we use at our own Bulb Nurseries, painted with ordinary white paint, using raw linseed oil, and written on while paint is wet with Wolff's indelible ink pencil, will last 3 to 4 years, per 100, 14/6; per doz. 2/-.

For Metallic Garden Labels, New “Ideal” Metallic Labels, etc., see BARR'S SEED GUIDE.

HYACINTH GLASSES, Plain colours, 6d., 8d., 10d., 1/-, to 1/6 each; per doz. 5/6, 7/6, 9/6, 11/6, to 16/6. In Fancy Designs, very choice, 2/6, 3/6, 4/6, to 10/6 each.

“ **Wire Supports** (brass), 4/6 per doz.

MANURES, SOILS, COCOA FIBRE, etc.

Barr's Phytobroma. The best Manure for Daffodils, Hyacinths, Tulips, etc. It should be mixed with the soil below the bulbs at planting time at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. **For Pots**, mix Phytobroma with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/-.

Basic Slag, per cwt. 10/6; per 7 lb. 1/-.

Bone Meal (Genuine fine Crushed Bones), best quality, per cwt. 14/-; per 7 lb. 1/3.

Sulphate of Potash, per cwt. 21/-; per 7 lb. 1/9.

Clay's Fertiliser, a well-known effective manure, confidently recommended. Tins 6d., 1/-, and 2/6 each; in bags, 7 lb., 2/6; 14 lb., 4/6; 28 lb., 7/6; ½-cwt., 12/-; 1 cwt., 20/-.

Ichthemic Guano, 7 lb., 2/6; 14 lb., 4/6; 28 lb., 7/6; 56 lb., 12/6; 1 cwt., 20/- (bags free). Sample tins, 6d. and 1/-.

Standen's Gardeners' and Amateurs' Manure, in tins, 6d., 1/-, 2/6 and 5/6; in bags, 28 lb., 10/6; 56 lb., 18/-; 1 cwt., 32/-.

Thomson's Vine and Plant Manure, 1 lb., 1/-; 3 lb., 2/-; 7 lb., 3/6; per ¼-cwt., 6/-; ½-cwt., 10/-; 1 cwt. 20/-.

Barr's Specially Prepared Fertilised Fibre and Charcoal Mixture for growing Bulbs in Bowls, Jardinets, Glasses, etc. Specially recommended for Hyacinths grown in glasses: fill the glasses with the preparation, and add water till no more can be absorbed. Place the bulb so as to rest the base on the preparation, and tie it down with brown paper, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remarks apply to bulbs grown in bowls, etc.: they must be kept in place till they have rooted. 3/6 per bushel; 1/- per peck.

Jadoo Fibre, cleanly to use, very light, for growing plants and bulbs in hanging baskets, jardinets, etc. Full particulars on application. Per peck, 1/-; per bushel, 3/6; per 3 bushels, 8/-.

Loam, Peat, Leaf Soil, Silver Sand, each, per bushel, 2/6.

Barr's Specially Prepared Potting Soil, containing a suitable quantity of Phytobroma, per bushel, 2/6.

Cocoa Fibre, superior quality, 1/3 per bushel; 4 bushels for 4/6.

Small Pebbles and Charcoal, suitable for growing Hyacinths, etc., in bowls and vases without drainage, 6d. per quart; 3/6 per peck.

For a fuller List of Garden Requisites, see BARR'S SEED GUIDE, free on application.

Special Notices and Terms of Business.

FREE CARRIAGE OF BULBS.

All Orders for Bulbs to value £1 and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

Prepaid Orders for Bulbs to value 10s. and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (with exception of the special Collections offered on page 3, *which are strictly nett*), and this may either be deducted by the Customer when remitting, or a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb accounts of 20s. and upwards when paid within 14 days from date of invoice (*excepting Collections on page 3, which are strictly nett*).

Terms of Credit.—Our books are made up at Christmas and Midsummer, when all accounts are due nett.

Orders.—We shall esteem it a favour if our Customers will kindly use the Order Sheet that accompanies this Catalogue, and be particular to fill in the full postal and rail address; sometimes Orders reach us without either name or address, and it is impossible to trace the senders.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London and County Bank." Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of dispatch and name of Railway Co.*

Catalogues.—Our **Seed Guide** is published in January, **Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting** in January, **Hardy Plant Catalogue** 1st of March, **Daffodil and General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Nurseries, Surbiton.—Our Nurseries are situated near to **Surbiton Station** (London and South-Western Railway). Visitors are invited during March, April, and May to see our magnificent Collections of Daffodils and Tulips in flower; and during Summer and Autumn to see our collection of Herbaceous Plants and Alpines, and many rare and beautiful Bulbous Plants. *Cabs are always to be had at Surbiton Station.*

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

Notices to our Foreign and Colonial Correspondents.

Prepayment necessary.—Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an "order to pay,"* on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Cash Discount 5%.—In the case of Prepaid Orders we allow a discount of 1s. in the £ from the amount of Seeds or Bulbs ordered, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage.—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Parcel Post Rates. AUSTRALIAN COMMONWEALTH: 6d. per lb. (1s. for the first lb.).
NEW ZEALAND: under 3 lb. 1s.; 7 lb. 2s.; 11 lb. 3s. TASMANIA: 6d. per lb. (1s. first lb.).
CAPE COLONY and NATAL: 9d. per lb. TRANSVAAL: 1s. per lb.
INDIA: 3 lb. for 1s.; 7 lb. for 2s.; 11 lb. for 3s. JAPAN: 3 lb. 1s. 10d.; 7 lb. 3s. 6d.; 11 lb. 5s. 2d.
CANADA: 6d. per lb. (8d. for the first lb.). CHINA: 3 lb. 1s.; 7 lb. 2s.; 11 lb. 3s.
UNITED STATES of America (*Official Service*): 2s. for each parcel not exceeding 4 lb. 6 oz. in weight.
We recommend the Parcel Post to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without shipping agents' additional charges.

Shipping, etc.—In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.

BARR & SONS' LONDON OFFICES AND WAREHOUSE.
